MARCH 2020 ISSUE

March 2020 – Innovations in Smart Policing

As smart technologies—those employing artificial intelligence and machine learning or interfacing with the Internet of Things (IoT)—continue to advance and enter the law enforcement marketplace, agencies worldwide are using these smart tools to better serve their communities and looking ahead to see what advantages (or shortcomings) future technologies might bring.

Three Novel Ways to Use ALPR

Law enforcement executives are just scraping the surface of ALPR potential—there are multiple ways the technology can go beyond traffic enforcement and contribute to crime investigation and prevention.

Lessons Learned on Implementing Big Data Machine Learning

A police department in Canada is using machine learning to combat property crime through location-based crime forecasting, while also finding ways to navigate factors such as privacy and transparency.

The Last Telecommunicator Has Been Born

As the policing field is on the cusp of change, law enforcement executives who embrace the future will explore how technology can assist in modern telecommunications and improve customer service.

Subject: COVID Protective Gear Assistance

I wanted to reach out with a few time-sensitive updates:

1. We are using our supply chain to source and donate over 1 million medical masks for first responders (along with thousands of gallons of hand sanitizer). Sign up at www.axon.com/COVID and let us know what supplies you need.
2. We have also made our Axon Citizen mobile data collection platform available to all public safety agencies through 2020. This enables officers to send text or email links to members of the public to submit photos, videos or other evidence. We are including all of the digital evidence sharing tech to share with courts, prosecutors, etc. as well. Purpose is to enable greater social distancing and avoid need to meet up in person to collect digital files. Info is at www.Axon.com/JoinForces
3. I am hosting a CEO roundtable on the topic of ALPR next Tuesday, April 14 to gather input for our AI Ethics Board to help inform their best practices recommendations on privacy and data handling. I will also be reviewing some of our product roadmap and our new partnership on fixed ALPR cameras. We really want to make sure law enforcement experts are engaged in the process so that the Board's best practices recommendation isn't unevenly weighted in favor of activist groups who tend to be very vocal, and very engaged. If you could encourage your ALPR experts in house to join, it would be super helpful. Link to register: <https://go.pardot.com/e/636291/ster-WN-b9o2RS2KT3epbJsTNI0F3w/423sjd/1304070945?h=Alg6oN2h6dK4WAcKK8QvtNeo9AEbswY9bMGjkTqnN3A> Don't hesitate to reach out to me or any member of your team here at Axon if there's anything else we can do to be supportive during the crisis.

Stay safe,

Rick

Sheriffs, Chiefs, Commanders:

A few of things ---

ISP Director Kelly Statewide LE Call

Illinois State Police will be hosting a follow-up conference call on Thursday, April 23, 2020 at 4:00 P.M. This call is designed for Chiefs, Sheriffs, Prosecutors and law enforcement executives. Please do not share the call-in details with media or those without a need to know. **The call-in information is as follows:**

██████████ ██████████
██████████ ██████████

If you would like to ask questions, please join the chat room at the below link, use your first and last name and agency you represent when entering as a guest. *Non-identifiable names, aliases or “handles” will be removed from the chat room.* ██████████

NARCAN Program Expansion

On April 8, 2020, ILEAS received a renewed grant from the IL. Department of Public Health to expand the NARCAN program. In the last several months, ILEAS and IDPH staff have worked thru data from a statewide survey and from a variety of IDPH information. That analysis added 26 counties to the original 18 counties located in South Central Illinois. [Click here for a map showing the new counties.](#) It is also posted on the ILEAS home page. Law enforcement agencies in these new counties will now have the opportunity to receive NARCAN (at no cost). Officers and deputies will also have access to the ILEAS NARCAN online training. Questions about

this expansion can be directed to Bill DeJarnette at whdejarnette@ileas.org

Regional Law Enforcement Support Centers

Just a reminder that the Regional Law Enforcement Support Centers are still active and available to assist you and your agency in any way during this COVID19 situation. The Support Centers have ILEAS RPCs, ISP command officers, National Guard representatives and have access to Dept. of Corrections staff as well. So far, the Support Centers have logged approximately 160 calls for service. Any agency, regardless of ILEAS membership, can utilize the Support Centers. The Support Centers' contact info is on your ILEAS web page.

ILETSB Policy and Guidance

ILETSB recently released two documents regarding training during the COVID19 situation. One is entitled "ILETSB Special Policies Regarding COVID19" and the other is "ILETSB COVID19 In-Service Guidance 4-16-20." Both documents can be found on your ILEAS page in the COVID19 box under the Federal and State Guidance category. There are a lot of other resources there as well.

EPIC License Plate Reader Info

ILEAS has been asked by the El Paso Intelligence Center (EPIC) to send the following message to our membership.

*"EPIC is responsible for the administration of DEA's Nationwide License Plate Reader Program (NLPRP). We are interested in identifying local Illinois police agencies that currently operate LPR systems. Our goal is to execute data sharing agreements in order to have access to the data they collect. This is not intended to be a one-way flow of information as all sworn law enforcement personnel may utilize DEA's NLPRP system either through the EPIC Watch or through the DEA Special Intelligence Link (DEASIL). **Does your agency currently operate either fixed or mobile LPR systems?** If so, would you please identify a POC to discuss a potential data sharing agreement? The POC for EPIC is Director James Reed. He can be contacted at (915) 760-2011 or via email at james.r.reed@usdoj.gov. For more information, two informational fliers. I have more information that I can send anyone that wants to know more. Just let me know and I will send it to you."*

As always, stay safe!

Subject: Re: LPR Addition Costs - e-Citation
Attachments:  LPR System w e-Cite Quote 051120.pdf

Good afternoon,

A revised LPR quote, which includes an e-Citation module and annual support costs is attached. The previous quote was for \$56,445 year 1, and \$10,000 for ongoing support years 2-5. With e-Citation, the new quote is \$57,945 year 1, and \$11,500 for ongoing support years 2-5. I would also like to point out that with e-Citation, we can expect an increase in postage expenses. How much of an increase would depend on our ability to either mail or email the initial citation. There would be some cost savings in printing costs (e.g. ticket stock, envelopes, etc.). Please let me know if you have any other questions.

Thank you,

Elizabeth (Beth) S. Beaty

Hi Bryant,

I just left you a voicemail, but thought I'd shoot you an email as well. Just wanted to learn a little more about the parking there and see if we might be able to help you all. Whether you're looking at adding paid parking, increasing enforcement, or collecting on unpaid parking citations, T2 Systems can help.

Looking forward to hearing from you!

Best,

Tailore

Career Transition for Police Professionals

You're invited to attend a **free** webinar happening Thursday, Nov 19th at 1 PM Eastern. Lt Tom Joyce, NYPD (ret.) will tell you the six things to do right now so you can be gainfully employed in a lucrative second career when you retire.

[Free Registration →](#)

Webinar Presenter Tom Joyce

Tom Joyce is currently the managing partner of Be Special Good, LLC, a business consultancy that focuses on start-up firms that sell technology to law enforcement. Tom was most recently at Motorola Solutions for a year and a half as a result of the acquisition of Vigilant Solutions where he held the role of Vice President of Business Development for 8 years. Tom was responsible for driving the vision and strategy for the International and Domestic Sales Teams for large-scale, strategic opportunities at Vigilant. His team worked closely with product management on public safety solutions, commercial license plate reader solutions, marketing on public safety activities and messaging and governmental legislative affairs.

Tom previously served as Director of Market Planning at LexisNexis for 6 years, the global leader in public records and proprietary data solutions for law enforcement.. Tom was responsible for driving data product innovation and market strategies for government solutions with a major focus on law enforcement.

Tom's experience as a former police officer and subsequent promotions to supervisory roles afforded him to transfer his knowledge from the public sector to the private sector as a subject matter expert.

Elizabeth,

Clearly UPD doesn't have LPRs. This FOIA is, however, applicable to parking. How would you like Amy to reassign this FOIA? Becky?

Subject: Apply to Become a LEADS Scholar, Civilian, or Academic

*** Email From An External Source ***

Law Enforcement Officers, Law Enforcement Civilians, and Academic Researchers Can Apply to be Part of NIJ's LEADS

The Law Enforcement Advancing Data and Science (LEADS) Programs are designed to increase the research capabilities of law enforcement officers and agencies by empowering law enforcement to integrate research into policies and practices. Those who are selected for these programs will have the opportunity to attend the 2021 International Association of Chiefs of Police (IACP) conference with all travel, accommodation, and per diem costs associated covered by NIJ, among other professional development benefits.

Applications for all three programs are now open and are due by May 3, 2021.

[LEADS Scholars](#)

The Scholars Program advances evidence-based policing by supporting the development of research-minded, mid-career law enforcement officers. LEADS Scholars are pioneers in the evidence-based policing movement, and present and publish frequently about their research and findings. LEADS Scholar projects have included studying the effectiveness of automatic license plate readers, the impact of stress on officers, and many other issues.

[LEADS Civilians](#)

The Civilians program enables law enforcement civilians to partner with LEADS Scholars, Alumni, and Academics to use data-driven strategies and locally tailored research to advance their agency's mission. Civilian roles may include crime analysts, law enforcement planners, project managers, legal analysts, or technology specialists.

[LEADS Academics](#)

The Academics program has the goal of advancing practitioner-led research and promoting sustainable researcher/practitioner partnerships. LEADS Academics must have been awarded their doctorate during or since calendar year 2016, have experience working on at least one research project that involved both working directly with a law enforcement agency and using data provided by that agency or collecting original data during the project, and must be full-time members of the faculty of universities or colleges granting Bachelors or higher-level degrees.

*** Email From An External Source ***

Hi DC Surles

I have been meeting with several departments in your area over last couple months about License plate readers and departments like Joliet and Decatur are seeing a ton of success identifying stolen vehicles coming out of Chicago into their Cities and stopping the offenders before they commit crimes.

Long story short - we make LPR Cameras that are:

- Solar and Cell powered (stationary - put them anywhere)
- Smart (they scan the entire vehicle using AI getting make/model/color/plate/temp plate/no plate... ext.)
- Affordable (\$2,500 all-in)

We partnered with the Dayton Police Department and they recently released a study showing a 43% reduction in crime once our cameras went live! I attached the report below. If you have time please take a look. It is awesome to be part of a company that is helping to solve and stop crime on a daily basis!

Are you available tomorrow or early next week for a quick call to learn more as well as tell you a bit about what Flock is doing for other departments?

Dan Murdock

Subject: Final Headcount/ Agenda Items

Good Morning,

Next Wednesday, March 24th is our CLIC Meeting here at the Decatur Police Department from 10AM- 2PM. Can I get confirmation from the Department's that will be coming. We can spread out enough in our training room if each agency want to bring one other person. Please let me know so I can do a head count for food so Ashley can place our order. Also, let me know if there is anything particular you want on the agenda. I will have the Police Reform Bill and Staffing/Recruiting/ Retention on the agenda plus anything else I come up with before the end of this week. Stay Safe and See you all next week.

Jim

Jim Getz

Chief of Police

Decatur Police Department

CLIC Team,

Unfortunately I was summoned to an in person meeting at 0900 hrs so it will be impossible to get to Decatur for our meeting since it's a 2:50 hour drive! My superpower of teleporting is glitchy otherwise I would be there!

I'm not sure if there is an opportunity to zoom in or not. If yes, kindly send a link. If not, no worries.

Kristen Ziman

Subject: Final Headcount/ Agenda Items

Good Morning,

Next Wednesday, March 24th is our CLIC Meeting here at the Decatur Police Department from 10AM-2PM. Can I get confirmation from the Department's that will be coming. We can spread out enough in our training room if each agency want to bring one other person. Please let me know so I can do a head count for food so Ashley can place our order. Also, let me know if there is anything particular you want on the agenda. I will have the Police Reform Bill and Staffing/Recruiting/ Retention on the agenda plus anything else I come up with before the end of this week. Stay Safe and See you all next week.

CLIC Team,

Unfortunately I was summoned to an in person meeting at 0900 hrs so it will be impossible to get to Decatur for our meeting since it's a 2:50 hour drive! My superpower of teleporting is glitchy otherwise I would be there!

I'm not sure if there is an opportunity to zoom in or not. If yes, kindly send a link. If not, no worries.

*** Email From An External Source ***

Hi Chief,

I hope all is well, my name is Michael and I work with Thomson Reuters CLEAR Investigations and I was reaching out looking to introduce you to our CLEAR platform for Law Enforcement.

CLEAR is an advanced, comprehensive investigative tool designed to help Law Enforcement Officers, Detectives, and Investigators find the important information they need to close cases faster. CLEAR uses real-time gateway data to interact with key report details so you can locate individuals, identify assets, and find key connections to ensure nothing is missing in your information and reports. We're partnered with Law Enforcement agencies across the U.S. and would love the opportunity to show you what we have to offer. I've included some brochures with more information, as well as a list of all the services we provide.

Are you available, or is someone from your office available sometime within the next coming weeks, to see an online demo of the platform to see if it could be useful? If you currently have a service in use, such as LexisNexis or Accurant, we'd love to show you how we compare and show you why agencies are switching to CLEAR from their current option.

What day/time would work best for someone to sit in on a 20-30 minute online demo of CLEAR? Feel free to email me back or give me a call at 952-214-6174 with some days, and I can schedule it right away.

CLEAR

- **Real Time & Historical Reverse phone** data for 50 states
- **Real Time Consumer and Credit Bureau** data from multiple sources including the only service to pull from all three major credit bureau agencies, Experian, Transunion & Equifax
- **Utility Hook-up** data updated daily
- **Real Time Incarceration & Arrest Records**, including lineup photos
- **Real Time State DMV** data
- **License Plate Recognition**
- **Multiple data sources** such as Pizza Delivery, Warranty Registration, Moving company, hunting and fishing licenses, etc.
- **Deep Web Analytics** - Search, organize, and analyze deep Web content from a variety of sources such as social media, blogs, news, etc. to gain actionable intelligence
- **Alerts** - Receive notification if any key information changes on the subject of your investigation
- **View data sources** within the platform so you can see where and when the data came from

Subject: Stolen From Car Dealership RFI

*** Email From An External Source ***

Good Morning,

We are trying to identify the young man pictured in the pics found here:

Please distribute to any and all agencies. The vehicle in the photos has been stolen from a break in at our local car dealership white Chrysler 300. We were able to recover 2 of the 3. If you have any information of car dealership thefts please let us know.

Additionally, I am including a photo of a 2008 Grey/Silver GMC Envoy Missouri tag # [REDACTED] registered to [REDACTED]. We tracked this vehicle from [REDACTED], through the LPR [REDACTED] the LPR [REDACTED] and back through the same route approximately 6 seconds behind our stolen vehicles. Any information would be greatly appreciated.

Thank you.

Dear Police1 Member,

The harsh reality of mental health services in the United States is that police are often the de facto first responders to people in crisis. Many law enforcement agencies have taken the laudable steps of staffing specialized response teams and training officers in crisis intervention. But tragic encounters between officers and people with mental health issues continue to occur.

Lexipol's latest webinar on March 30 – [Response to People in Crisis](#) – will explore how crisis mitigation requires officers to draw on a different skillset than many other types of response. Attendees will learn tactics to de-escalate such situations and gain insight into the proper perspective to assist them when dealing with a person in crisis.

Dan,

I did not receive any emails from you prior to this one below. I did not have a way to contact you. When you called that afternoon, I was in a meeting with our legal division, so could not get away to answer my phone. I apologize for the inconvenience.

We had 2 homicides this weekend and am busy assisting in that this week. Perhaps we can re-schedule at a later time.

Lt.

Good Afternoon, I am sorry to hear that my calendar invite did not make it to you. I know you said you are going to be busy this week, but I am meeting with the Chief of Police and City Manager of Rantoul Wednesday at 1:30 in person. We are still finalizing that time, but would you be interested in joining us, I spoke to DC Bouse and he said that would be fine if you were interested. Rantoul is looking to put in somewhere around 15 cameras and the City Manager wants to see a full demo.

If Wednesday does not work for you how does Monday Afternoon or anytime Tuesday work for a webinar?

Please let me know,

Regards,

Subject: BodyWorn by Utility, Endorsed by the NAACP

*** Email From An External Source ***

Chief Seraphin,

With all the civil unrest we are experiencing across the country, you certainly do not want to get caught in a situation where you don't have the incident on video. The only way to 100% ensure you have the video you need is with a fully automated system. Our system is the only system in the world that can do this. We have removed the human error element out of failed officer activations. That coupled with our other technology makes our system much more than just a box recording what has already occurred.

We are the ONLY body camera vendor who is endorsed by the NAACP.

Our BWC system is a force multiplier as a situational awareness tool, critical incident management, real-time crime mapping, communications platform, officer safety component, automation of recordings to remove failed activation from human error and live video offload, eliminating the need for those silly docking stations. During these turbulent times, you need a system that is a force multiplier of what you are already doing, not just a box recording what has already happened.....

Just a few of the things that make us unique:

- Our system has **perfected automation**. Why are we asking our officers to do something that technology can do for them? Transparency and accountability..... how much more transparent and accountable can you be when you have a system that is automated. Let the officers do their job.... we will do the rest.
- BodyWorn is **securely mounted** inside the uniform. Never again will your body camera fall off, get broken or lost.... let alone not recording that use of force incident you are now being sued for.
- BodyWorn **Holster Activation** will automatically turn the officers body camera on when their weapon is drawn from the holster.
- **Officer Down Safety Feature**, if an officer goes down, the BodyWorn device will alert every officer working and send turn by turn directions to find that officer to save their life.
- **Live View**, Command Staff can live view any officer from any location giving real time actionable intelligence. Imagine what you could do with real time intelligence during volatile situations or as your SWAT Team is making entry.
- **Automatic Policy Based Recordings** allow you to customize, based on proximity, call nature codes, or a number of other actionable items will trigger the BodyWorn to start recording. This takes the burden off the officer to activate their body camera. Just think, how many encounters have your officers not recorded because they forgot to activate their camera or that the incident escalated too quickly to allow time for activation. We are the only BWC in the world that can remote activate cameras.
- **No Docking Stations** our cameras wirelessly and continuously offload videos straight to the cloud. Your BWC footage is available real time in the cloud. Never again wait for your officers to come back to HQ to dock or plug in your camera to offload videos.
- **Real-Time Crime Mapping**, our solution provides your agency real-time crime mapping of every calls for service within your community providing you real time criminal intelligence
- **Unlimited Cloud Storage**, all videos wireless and continuously live upload to the cloud for secure unlimited storage. No additional storage fees, true unlimited storage. No more plug and play or docking cameras and waiting for upload.
- **SmartRedaction**, unlimited, simple to use redaction. Redact your videos in seconds, not hours and not frame by frame.
- **Digital Evidence Management System**, one complete platform which becomes your total digital evidence ecosystem.
- **Complete Body Camera and/or In-Car Video System**, one complete ecosystem. No more standalone Mifi's, routers or modems.
- **Automated License Plate Reader (LPR)**, our LPR system integrates with our ICV and BWC for one complete ecosystem.
- At BodyWorn we operate on a SaaS business model where **we are selling you a service, not hardware**. Never again will you own outdated, antiquated and unsupported equipment again. Always supported. Always maintained.

My cell is the best way to reach me, 765-237-1769.

Lt Bain,

Good Afternoon, I hope all is well. I wanted to follow up and see if you had some time next week for us to connect and show you why many of your neighbors are either using Flock I ke Decatur, or purchasing Flock in near future like Rantoul & Springfield. Are you available to reset our demo for next Monday or Tuesday anytime after 2:30?

Please let me know what works for you.

Regards,

Subject: Introducing The Rocket 3.0 System

*** Email From An External Source ***

Add on Now or Later

Utility Inc. is moving to a module-based structure. What does this mean?

Utility just announced the launch of the new and improved RocktloT® 3.0 in-car video and communications system. You can start with the "Core" of the new RocketIoT platform. Add-on as needed.

In-Car Video Module

- Powers up to four cameras
- Secure wireless upload
- CJIS compliant transfer and storage

Automatic License Plate Recognition Module

- Passively scans and processes license plate data
- Gathers real-time evidence
- AI based

On-board Diagnostics Module

- Live view of vehicle diagnostics
- Fleet management reports
- Vehicle diagnostics reporting

Crash Sensor Module

- Detects vehicle crash

- **BodyWorn Module**

- Secure wireless upload
- Network storage - core can store up to 80 hours of video
- Policy-based recording using digital inputs

Additionally, Utility has developed a **new purpose-built, multi-use vehicle video camera** designed specifically support both the in-car video and the license plate reader modules.

LT,

I wanted to circle back on the information I sent you the other day. As you saw, we have perfected automation. We have eliminated the need for officers to turn their BWC on. How much more transparent, how much more accountable can you be to your citizenry than with an automated system? **Automation is the only way to ensure every citizen contact is recorded. Automation is the only way to ensure true accountability and transparency to your community.** Which is a large reason why we are the ONLY vendor with the endorsement of the NAACP.

Just a few of the things that make us unique:

- Our system has **perfected automation**. Why are we asking our officers to do something that technology can do for them? Transparency and accountability..... how much more transparent and accountable can you be when you have a system that is automated. Let the officers do their job.... we will do the rest.
- BodyWorn is **securely mounted** inside the uniform. Never again will your body camera fall off, get broken or lost.... let alone not recording that use of force incident you are now being sued for.
- BodyWorn **Holster Activation** will automatically turn the officers body camera on when their weapon is drawn from the holster.
- **Officer Down Safety Feature**, if an officer goes down, the BodyWorn device will alert every officer working and send turn by turn directions to find that officer to save their life.
- **Live View**, Command Staff can live view any officer from any location giving real time actionable intelligence. Imagine what you could do with real time intelligence during volatile situations or as your SWAT Team is making entry.
- **Automatic Policy Based Recordings** allow you to customize, based on proximity, call nature codes, or a number of other actionable items will trigger the BodyWorn to start recording. This takes the burden off the officer to activate their body camera. Just think, how many encounters have your officers not recorded because they forgot to activate their camera or that the incident escalated too quickly to allow time for activation. We are the only BWC in the world that can remote activate cameras.
- **No Docking Stations** our cameras wirelessly and continuously offload videos straight to the cloud. Your BWC footage is available real time in the cloud. Never again wait for your officers to come back to HQ to dock or plug in your camera to offload videos.
- **Real-Time Crime Mapping**, our solution provides your agency real-time crime mapping of every calls for service within your community providing you real time criminal intelligence
- **Unlimited Cloud Storage**, all videos wireless and continuously live upload to the cloud for secure unlimited storage. No additional storage fees, true unlimited storage. No more plug and play or docking cameras and waiting for upload.
- **SmartRedaction**, unlimited, simple to use redaction. Redact your videos in seconds, not hours and not frame by frame.
- **Digital Evidence Management System**, one complete platform which becomes your total digital evidence ecosystem.
- **Complete Body Camera and/or In-Car Video System**, one complete ecosystem. No more standalone Mifi's, routers or modems.
- **Automated License Plate Reader** (LPR), our LPR system integrates with our ICV and BWC for one complete ecosystem.
- At BodyWorn we operate on a SaaS business model where **we are selling you a service, not hardware**. Never again will you own outdated, antiquated and unsupported equipment again. Always supported. Always maintained.

My cell is the best way to reach me, 765-237-1769.

Subject: Six applications for Electric Utility Vehicles

*** Email From An External Source ***

Six applications for Electric Utility Vehicles:

Electric Utility Vehicles are the future of mobility the most intelligent solution for facing future market challenges, and several advantages worth looking at.

Our new and refreshed [website](#) now allows you to search our entire portfolio by application before deciding which vehicle is the right fit. Did you know that besides the iconic GO 4, our MAX EV 3 is also a Parking Specific Vehicle (PSV)?

Check out the applications below and discover the solutions Westward can offer.

1) Parking Enforcement & ALPR

The GO- and MAX-EV 3 are compact and narrow, allowing parking enforcement operators to perform their work while minimizing traffic disruption. In increasing department efficiency as operators can park next to the infraction vehicle.

[Visit](#)

2) Refuse Hauling

The XTR refuse platform built into the GO- , reliably withstand loads up to 800lbs. A rugged poly bin and highly fortified rear suspension allows the GO- XTR refuse hauler to perform as a nimble trash hauling work horse.

[Visit](#)

3) Maintenance & Landscape

The MAX-EV is entirely customizable and made to order. Optimize work and easily transport supplies and equipment. From overhead ladder racks to enclosed rear compartment to keep materials from the elements.

[Visit](#)

4) Construction & Industrial

Navigate through soft, rough, small construction or industrial sites with the MAX-EV. This reliable option for moving equipment and waste is an excellent compact alternative to any other transporter with minimum ground pressure.

[Visit](#)

5) Food Service & Mobile Business

Our MAX-EV and MAX-EV 3 are ideal for mobile businesses. The vehicles are smaller and more mobile than a truck and trailer. Can easily enter outdoor markets or work indoors, due to zero emissions.

[Visit](#)

6) Delivery & Cargo

The MAX-EV with cargo van body is a street-legal LSV (low speed vehicle) designed with productivity in mind to support the micro-distribution and Last-mile delivery industry. The MAX-EV 3 allows for quicker delivery with a reduced payload. Both are built tough, compact and can handle the repetitive duties associated with the task.

Chief Seraphin,

As you have seen, our technology is superior to any other vendor. Could we set up a quick demo?

Our BWC system is a force multiplier as a situational awareness tool, critical incident management, real-time crime mapping, communications platform, officer safety component, automation of recordings to remove failed activation from human error and live video offload, eliminating the need for those silly docking stations. During these turbulent times, you need a system that is a force multiplier of what you are already doing, not just a box recording what has already happened.....

Just a few of the things that make us unique:

- Our system has **perfected automation**. Why are we asking our officers to do something that technology can do for them? Transparency and accountability..... how much more transparent and accountable can you be when you have a system that is automated. Let the officers do their job.... we will do the rest.
- BodyWorn is **securely mounted** inside the uniform. Never again will your body camera fall off, get broken or lost.... let alone not recording that use of force incident you are now being sued for.
- BodyWorn **Holster Activation** will automatically turn the officers body camera on when their weapon is drawn from the holster.
- **Officer Down Safety Feature**, if an officer goes down, the BodyWorn device will alert every officer working and send turn by turn directions to find that officer to save their life.
- **Live View**, Command Staff can live view any officer from any location giving real time actionable intelligence. Imagine what you could do with real time intelligence during volatile situations or as your SWAT Team is making entry.
- **Automatic Policy Based Recordings** allow you to customize, based on proximity, call nature codes, or a number of other actionable items will trigger the BodyWorn to start recording. This takes the burden off the officer to activate their body camera. Just think, how many encounters have your officers not recorded because they forgot to activate their camera or that the incident escalated too quickly to allow time for activation. We are the only BWC in the world that can remote activate cameras.
- **No Docking Stations** our cameras wirelessly and continuously offload videos straight to the cloud. Your BWC footage is available real time in the cloud. Never again wait for your officers to come back to HQ to dock or plug in your camera to offload videos.
- **Real-Time Crime Mapping**, our solution provides your agency real-time crime mapping of every calls for service within your community providing you real time criminal intelligence
- **Unlimited Cloud Storage**, all videos wireless and continuously live upload to the cloud for secure unlimited storage. No additional storage fees, true unlimited storage. No more plug and play or docking cameras and waiting for upload.
- **SmartRedaction**, unlimited, simple to use redaction. Redact your videos in seconds, not hours and not frame by frame.
- **Digital Evidence Management System**, one complete platform which becomes your total digital evidence ecosystem.
- **Complete Body Camera and/or In-Car Video System**, one complete ecosystem. No more standalone Mifi's, routers or modems.
- **Automated License Plate Reader** (LPR), our LPR system integrates with our ICV and BWC for one complete ecosystem.
- At BodyWorn we operate on a SaaS business model where **we are selling you a service, not hardware**. Never again will you own outdated, antiquated and unsupported equipment again. Always supported. Always maintained.

My cell is the best way to reach me, 765-237-1769.

Lt. Bain,

I hope all is well. It has been a little while since we last connected & I wanted to reach out to see if LPR's were still something your department was interested in looking at for 2021. Departments across the region like Decatur, Springfield and Rantoul have seen a lot of value in Flock & are using the filtering capability to clear High Profile property and violent crimes.

We regularly receive feedback like the note below from agencies using our cameras.

Are you available for a quick call tomorrow or early next week to discuss how Flock can help your department?

Please Advise,

Dan Murdock

[View as webpage](#)

Dear Police1 Member,

Over the past year, officers and their families have faced some of the biggest challenges that have ever confronted law enforcement. Following the terrible and tragic death of George Floyd, LEOs experienced a backlash of anger, protests, political opposition and defunding that rocked policing to its core. All of this came amid the worst global pandemic in a century, a direct and dire threat to those serving on the front lines, and we still do not know how many of our officers and their family members have been killed by COVID-19.

Being an officer has never been more difficult or demanding and for many who serve, this has resulted in a deprioritizing of personal wellness. However, it has never been more important to keep your heart, mind and body fit. Officer wellness is key to doing all we can to help improve community relations and officer retention and recruitment as we look toward the future.

Society outsources the most difficult challenges to law enforcement, and it's only fair that officers have high-quality support when facing their own challenges. Take good care of yourself and your fellow officers. Surround yourself with good people who support you. Talk with peer support. Connect with a high-quality, culturally competent therapist. Do your part to help smash the stigma that makes it so difficult for so many in the profession to seek help.

We thank you for your service, your sacrifices and all you have done to keep our communities safe during the past year.

Stay safe,

— *Dr. David Black, founder and CEO of Cordico*

Hi Chief Seraphin

I have been meeting with several departments in your area over last couple months about License plate readers and several cities in your area are seeing a ton of success identifying stolen vehicles and stopping the offenders before they commit crimes.

Long story short - we make LPR Cameras that are:

- Solar and Cell powered (stationary - put them anywhere)
- Smart (they scan the entire vehicle using AI getting make/model/color/plate/temp plate/no plate... ext.)
- **Affordable (\$2,500 all-in)**

I included a case study of a department around your size who saw a 70% drop in crime after utilizing Flock for 1 year.

Are you available early next week for a quick call to learn more as well as tell you a bit about what Flock is doing for other departments?

Mayor Wolfe Marlin

If you are like many leaders in Illinois you have seen the rise of carjacking & Violent Crime in your area. Your residents might already know someone impacted, but they are definitely seeing the threat on the news with stories like this one from [Champaign Man Dies Monday After Being Shot Sunday](#). Flock would of help solve this crime because we can identify cars not just by plate, but make, color and type of vehical.

Cities like Rantoul, Decatur, Joilet & more have turned to Flock for help. We provide affordable license plate readers that integrate with State and Federal stolen car databases to provide Police real time information when a stolen car is in your town. So they can react before that Stolen Vehicle can cause bigger issues.

If you are interested in learning more lets set up some time to connect. Are you available early next week.

Regards,

Dan Murdock

Chief,

From what I understand about the case the best lead you guys got was a description of Silver Sedan. With Flock you can choose the cameras you think the car might of past in a time window then filter the cameras in the area by silver sedans and then work back to the license plate. Like the picture below.

I understand that the Urbana PD had looked at LPR's a while ago and the City Council had Civil Liberty concerns. Flock has worked with Civil Liberty groups to design a LPR system with some of those concerns in mind. At the very least I think it would be productive for the department to see what other similar sized cities like Decatur, Springfield and Joilet are doing to combat crime like this. I am currently trying to find some time next week for me to meet with the Champaign PD would you like to join that meeting, or have a representative from the Urbana PD join when that is set up?

LT,

Are you interested in our solution? Could we set up a quick demo?

Our BWC system is a force multiplier as a situational awareness tool, critical incident management, real-time crime mapping, communications platform, officer safety component, automation of recordings to remove failed activation from human error and live video offload, eliminating the need for those silly docking stations. During these turbulent times, you need a system that is a force multiplier of what you are already doing, not just a box recording what has already happened.....

Just a few of the things that make us unique:

- Our system has **perfected automation**. Why are we asking our officers to do something that technology can do for them? Transparency and accountability..... how much more transparent and accountable can you be when you have a system that is automated. Let the officers do their job.... we will do the rest.
- BodyWorn is **securely mounted** inside the uniform. Never again will your body camera fall off, get broken or lost.... let alone not recording that use of force incident you are now being sued for.
- BodyWorn **Holster Activation** will automatically turn the officers body camera on when their weapon is drawn from the holster.
- **Officer Down Safety Feature**, if an officer goes down, the BodyWorn device will alert every officer working and send turn by turn directions to find that officer to save their life.
- **Live View**, Command Staff can live view any officer from any location giving real time actionable intelligence. Imagine what you could do with real time intelligence during volatile situations or as your SWAT Team is making entry.
- **Automatic Policy Based Recordings** allow you to customize, based on proximity, call nature codes, or a number of other actionable items will trigger the BodyWorn to start recording. This takes the burden off the officer to activate their body camera. Just think, how many encounters have your officers not recorded because they forgot to activate their camera or that the incident escalated too quickly to allow time for activation. We are the only BWC in the world that can remote activate cameras.
- **No Docking Stations** our cameras wirelessly and continuously offload videos straight to the cloud. Your BWC footage is available real time in the cloud. Never again wait for your officers to come back to HQ to dock or plug in your camera to offload videos.
- **Real-Time Crime Mapping**, our solution provides your agency real-time crime mapping of every calls for service within your community providing you real time criminal intelligence
- **Unlimited Cloud Storage**, all videos wireless and continuously live upload to the cloud for secure unlimited storage. No additional storage fees, true unlimited storage. No more plug and play or docking cameras and waiting for upload.
- **SmartRedaction**, unlimited, simple to use redaction. Redact your videos in seconds, not hours and not frame by frame.
- **Digital Evidence Management System**, one complete platform which becomes your total digital evidence ecosystem.
- **Complete Body Camera and/or In-Car Video System**, one complete ecosystem. No more standalone Mifi's, routers or modems.
- **Automated License Plate Reader** (LPR), our LPR system integrates with our ICV and BWC for one complete ecosystem.
- At BodyWorn we operate on a SaaS business model where **we are selling you a service, not hardware**. Never again will you own outdated, antiquated and unsupported equipment again. Always supported. Always maintained.

My cell is the best way to reach me, 765-237-1769.

Major International Sting Uses Fake App Developed By FBI To Take Down Organized Crime Groups

[Reuters](#) (6/8, Packham, Sterling) reports that a "global sting in which organised crime gangs were sold encrypted phones that law enforcement officials could monitor has led to more than 800 arrests and the confiscation of drugs, weapons, cash and luxury cars, officials said on Tuesday." The operation by the FBI, Australian and European police around the world "involved in the global narcotics trade, the officials said. Millions of dollars in cash were seized in raids around the world, along with 30 tonnes of drugs including more than eight tonnes of cocaine." The [Wall Street Journal](#) (6/8, Subscription Publication) reports that the takedown involved more than 9,000 law enforcement personnel worldwide that search 700 locations in the previous 48 hours, according to authorities in the US, New Zealand, Australia and Europe.

The [AP](#) (6/8, Phillips) reports that "criminal gangs divulged plans for moving drug shipments and carrying out killings on a messaging app secretly run by the FBI, law enforcement agencies said Tuesday, as they unveiled a global sting operation they said dealt an 'unprecedented blow' to organized crime in countries around the world." With several encrypted platforms taken down, and gangs seeking new ways of communication, the FBI "stepped in with a covertly developed app called ANOM that was installed on modified mobile phones. Over the past 18 months, the FBI provided phones via unsuspecting middlemen to more than 300 gangs operating in more than 100 countries."

Sen. Scott Pessimistic About Reaching Deal On Police Reform Before June Deadline

[The Hill](#) (6/8, Bolton) reports that Sen. Tim Scott (R-SC), "the lead Republican negotiator on police reform, says it will be 'very hard' to reach a bipartisan deal by the end-of-June deadline if senators working on the issue can't get a proposal down on paper in the next week or two." The Hill adds that lawmakers are "still deadlocked over how to handle key issues such as exposing police officers to civil liability and criminal prosecution, the prospect of a deal by month's end appears to be slipping."

Violence Project: Recent US Mass Shootings Were Highest Three-Month Total Since 1966

The [Wall Street Journal](#) (6/8, Elinson, Melgar, Riley, Subscription Publication) reports that according to the Violence Project's database, the five mass shootings that killed at least four people each from March to May was the most of a three-month period since 1966.

Miami-Dade County Approves Plan To Reduce Gun Violence

The [AP](#) (6/8) reports from Miami, Florida, "Florida's largest county is moving forward after a recent spike in shootings with a nearly \$8 million plan to reduce gun violence, seeking to focus on jobs for troubled teens and added funding for law enforcement." The AP adds, "Miami-Dade commissioners unanimously approved Mayor Daniella Levine Cava's proposal at a meeting Tuesday, which followed an uptick in gun violence that began Memorial Day weekend." According to the AP, "The 'Peace and Prosperity Plan' is being funded by a naming-rights deal made earlier this year with FTX, a Bitcoin trading platform, for the county-owned arena where the Miami Heat play. FTX Arena had previously been called American Airlines Arena. Most of the money is to go to a program that focuses on teenagers already in the juvenile-justice system by providing summer camps, counseling and paying jobs. Funds are also going toward surveillance cameras, license-plate readers and additional police to monitor social media for threats that could lead to shootings."

Thousands Of UK Police Brace For G-7 Protests

The [AP](#) (6/8) reports from Carbis Bay, England, "Thousands of police have been drafted in from across Britain to beef up security for what organisers promise will be disruptive and "annoying" protests when G7 leaders gather for a summit this week." The AP adds, "The first in-person meeting of the leaders of major developed economies for nearly two years will take place in Cornwall on the tip of southwestern England, with the focus on the COVID-19 pandemic and climate change. Police have closed off roads and coastal paths to Carbis Bay, the small seaside resort which is hosting the event, erecting steel fences and putting other restrictions in place. An extra 5,000 officers have been drafted in to help the operation with about 6,500 officers and staff involved altogether, Devon and Cornwall Police said."

Wisconsin Lawmakers Approve Funding For State Patrol Body Cameras

The [AP](#) (6/8) reports, "Some Wisconsin State Patrol troopers would be equipped with body cameras under a vote Tuesday by the Republican-controlled state budget committee." The Joint Finance Committee "approved only a portion of the funding for body cameras that Gov. Tony Evers requested. Evers wanted \$700,000 in funding annually to pay for 500 cameras and to store data over five years. The committee approved \$700,000 in funding for one year only, which would pay for 100 cameras." The AP adds, "Approval for State Patrol cameras came after the committee previously rejected spending \$100,000 to buy cameras for state Capitol police officers."

Traffic Enforcement In Iowa To Be Stepped Up In Response To Increasing Road Fatalities

The [AP](#) (6/8) reports Iowa traffic enforcement officials pledged Tuesday to "crack down on motorists speeding, driving while drunk or distracted by cell phones in an effort to slow the rising traffic fatality rate." State officials "reported nearly 1,500 citations written last year for speeds of 100 mph or more." The "119 fatalities so far this year are ahead of last year's pace, and officials note traffic deaths often rise in the summer." In response, law enforcement will "increase the presence of officers on Iowa roads from June 9-12, looking for seatbelt violations, impaired driving, excessive speed and distracted driving."

[Virtual Training - Enhancing Law Enforcement Response to Violence Against Women](#)

The IACP will be hosting a five-part virtual training series about improving law enforcement response to violence against women (VAW) crimes beginning June 22nd and taking place once weekly until July 20th. Each session will focus on a different aspect of VAW crimes, discussing current information and practical skills on topics such as strangulation, stalking, and predominant aggressor determination. German Police Conduct Raids On Welfare Fraud, Illegal Gambling Group

The [AP](#) (6/8) reports approximately 600 investigators “searched 31 buildings in the western German state of North Rhine-Westphalia and police arrested a family of four Tuesday in connection with alleged money laundering, organized crime and welfare fraud.” Police and special units “from the state office that investigates organized crime arrested a 46-year-old man, his 42-year-old wife and the couple’s two sons, 24 and 28, at the family’s mansion in the city of Leverkusen. None of their identities were released in line with German privacy rules.” Police “said the family is accused of defrauding North Rhine-Westphalia of about 400,000 euros (\$487,000) in social welfare benefits while living in the million-euro house.” In a separate operation, “several hundred Berlin police officers searched a hotel in the German capital as part of an illegal gambling investigation. The officers searched 160 rooms and the basement of the hotel in the western Charlottenburg district late Monday, dpa said.”

Amid Surging Hate Crimes, Asian-Americans Reluctant To Reopen

The [New York Times](#) (6/8, Healy) reports “a surge in anti-Asian attacks during the pandemic is now holding back many Asian American families from joining the rest of the country in getting back to normal.” The Times says, “As schools phase out remote learning, companies summon employees back to work and masks fly off people’s faces, Asian Americans say that America’s race to reopen is creating a new wave of worries – not about getting sick, but whether they will be attacked if they venture back onto a bus or accosted if they return to a favorite cafe or bookstore.” The Times profiles several members of the Asian-American community who report fears about returning their children to school, attending community events, or traveling.

Technology

Brief Global Outage Takes Down Dozens Of Websites

According to the [AP](#) (6/8, Chan), “Dozens of websites went down briefly around the globe Tuesday, including CNN, The New York Times and Britain’s government home page, after an outage at the cloud computing service Fastly, illustrating how vital a small number of behind-the-scenes companies have become to running the internet.” The AP adds websites “that could not be reached also included some Amazon pages, the Financial Times, Reddit, Twitch and The Guardian.” San Francisco-based Fastly, a content-delivery network, “said in an emailed statement that it was a ‘technical issue’ and ‘not related to a cyber attack.’”

[The Guardian \(UK\)](#) (6/8, Hern, Sabbagh) reports the outage “should act as a ‘wake-up call’ that internet infrastructure has become dangerously over-centralised and lacks resilience, security experts have warned.”

Major International Sting Uses Fake App Developed By FBI To Take Down Organized Crime Groups

[Reuters](#) (6/8, Packham, Sterling) reports that a "global sting in which organised crime gangs were sold encrypted phones that law enforcement officials could monitor has led to more than 800 arrests and the confiscation of drugs, weapons, cash and luxury cars, officials said on Tuesday." The operation by the FBI, Australian and European police around the world "involved in the global narcotics trade, the officials said. Millions of dollars in cash were seized in raids around the world, along with 30 tonnes of drugs including more than eight tonnes of cocaine." The [Wall Street Journal](#) (6/8, Subscription Publication) reports that the takedown involved more than 9,000 law enforcement personnel worldwide that search 700 locations in the previous 48 hours, according to authorities in the US, New Zealand, Australia and Europe.

The [AP](#) (6/8, Phillips) reports that "criminal gangs divulged plans for moving drug shipments and carrying out killings on a messaging app secretly run by the FBI, law enforcement agencies said Tuesday, as they unveiled a global sting operation they said dealt an 'unprecedented blow' to organized crime in countries around the world." With several encrypted platforms taken down, and gangs seeking new ways of communication, the FBI "stepped in with a covertly developed app called ANOM that was installed on modified mobile phones. Over the past 18 months, the FBI provided phones via unsuspecting middlemen to more than 300 gangs operating in more than 100 countries."

Sen. Scott Pessimistic About Reaching Deal On Police Reform Before June Deadline

[The Hill](#) (6/8, Bolton) reports that Sen. Tim Scott (R-SC), "the lead Republican negotiator on police reform, says it will be 'very hard' to reach a bipartisan deal by the end-of-June deadline if senators working on the issue can't get a proposal down on paper in the next week or two." The Hill adds that lawmakers are "still deadlocked over how to handle key issues such as exposing police officers to civil liability and criminal prosecution, the prospect of a deal by month's end appears to be slipping."

Violence Project: Recent US Mass Shootings Were Highest Three-Month Total Since 1966

The [Wall Street Journal](#) (6/8, Elinson, Melgar, Riley, Subscription Publication) reports that according to the Violence Project's database, the five mass shootings that killed at least four people each from March to May was the most of a three-month period since 1966.

Miami-Dade County Approves Plan To Reduce Gun Violence

The [AP](#) (6/8) reports from Miami, Florida, "Florida's largest county is moving forward after a recent spike in shootings with a nearly \$8 million plan to reduce gun violence, seeking to focus on jobs for troubled teens and added funding for law enforcement." The AP adds, "Miami-Dade commissioners unanimously approved Mayor Daniella Levine Cava's proposal at a meeting Tuesday, which followed an uptick in gun violence that began Memorial Day weekend." According to the AP, "The 'Peace and Prosperity Plan' is being funded by a naming-rights deal made earlier this year with FTX, a Bitcoin trading platform, for the county-owned arena where the Miami Heat play. FTX Arena had previously been called American Airlines Arena. Most of the money is to go to a program that focuses on teenagers already in the juvenile-justice system by providing summer camps, counseling and paying jobs. Funds are also going toward surveillance cameras, license-plate readers and additional police to monitor social media for threats that could lead to shootings."

Thousands Of UK Police Brace For G-7 Protests

The [AP](#) (6/8) reports from Carbis Bay, England, "Thousands of police have been drafted in from across Britain to beef up security for what organisers promise will be disruptive and "annoying" protests when G7 leaders gather for a summit this week." The AP adds, "The first in-person meeting of the leaders of major developed economies for nearly two years will take place in Cornwall on the tip of southwestern England, with the focus on the COVID-19 pandemic and climate change. Police have closed off roads and coastal paths to Carbis Bay, the small seaside resort which is hosting the event, erecting steel fences and putting other restrictions in place. An extra 5,000 officers have been drafted in to help the operation with about 6,500 officers and staff involved altogether, Devon and Cornwall Police said."

Wisconsin Lawmakers Approve Funding For State Patrol Body Cameras

The [AP](#) (6/8) reports, "Some Wisconsin State Patrol troopers would be equipped with body cameras under a vote Tuesday by the Republican-controlled state budget committee." The Joint Finance Committee "approved only a portion of the funding for body cameras that Gov. Tony Evers requested. Evers wanted \$700,000 in funding annually to pay for 500 cameras and to store data over five years. The committee approved \$700,000 in funding for one year only, which would pay for 100 cameras." The AP adds, "Approval for State Patrol cameras came after the committee previously rejected spending \$100,000 to buy cameras for state Capitol police officers."

Traffic Enforcement In Iowa To Be Stepped Up In Response To Increasing Road Fatalities

The [AP](#) (6/8) reports Iowa traffic enforcement officials pledged Tuesday to "crack down on motorists speeding, driving while drunk or distracted by cell phones in an effort to slow the rising traffic fatality rate." State officials "reported nearly 1,500 citations written last year for speeds of 100 mph or more." The "119 fatalities so far this year are ahead of last year's pace, and officials note traffic deaths often rise in the summer." In response, law enforcement will "increase the presence of officers on Iowa roads from June 9-12, looking for seatbelt violations, impaired driving, excessive speed and distracted driving."

[Virtual Training - Enhancing Law Enforcement Response to Violence Against Women](#)

The IACP will be hosting a five-part virtual training series about improving law enforcement response to violence against women (VAW) crimes beginning June 22nd and taking place once weekly until July 20th. Each session will focus on a different aspect of VAW crimes, discussing current information and practical skills on topics such as strangulation, stalking, and predominant aggressor determination. For more information and registration details, click [here](#).

German Police Conduct Raids On Welfare Fraud, Illegal Gambling Group

The [AP](#) (6/8) reports approximately 600 investigators “searched 31 buildings in the western German state of North Rhine-Westphalia and police arrested a family of four Tuesday in connection with alleged money laundering, organized crime and welfare fraud.” Police and special units “from the state office that investigates organized crime arrested a 46-year-old man, his 42-year-old wife and the couple’s two sons, 24 and 28, at the family’s mansion in the city of Leverkusen. None of their identities were released in line with German privacy rules.” Police “said the family is accused of defrauding North Rhine-Westphalia of about 400,000 euros (\$487,000) in social welfare benefits while living in the million-euro house.” In a separate operation, “several hundred Berlin police officers searched a hotel in the German capital as part of an illegal gambling investigation. The officers searched 160 rooms and the basement of the hotel in the western Charlottenburg district late Monday, dpa said.”

Amid Surging Hate Crimes, Asian-Americans Reluctant To Reopen

The [New York Times](#) (6/8, Healy) reports “a surge in anti-Asian attacks during the pandemic is now holding back many Asian American families from joining the rest of the country in getting back to normal.” The Times says, “As schools phase out remote learning, companies summon employees back to work and masks fly off people’s faces, Asian Americans say that America’s race to reopen is creating a new wave of worries – not about getting sick, but whether they will be attacked if they venture back onto a bus or accosted if they return to a favorite cafe or bookstore.” The Times profiles several members of the Asian-American community who report fears about returning their children to school, attending community events, or traveling.

Technology

Brief Global Outage Takes Down Dozens Of Websites

According to the [AP](#) (6/8, Chan), “Dozens of websites went down briefly around the globe Tuesday, including CNN, The New York Times and Britain’s government home page, after an outage at the cloud computing service Fastly, illustrating how vital a small number of behind-the-scenes companies have become to running the internet.” The AP adds websites “that could not be reached also included some Amazon pages, the Financial Times, Reddit, Twitch and The Guardian.” San Francisco-based Fastly, a content-delivery network, “said in an emailed statement that it was a ‘technical issue’ and ‘not related to a cyber attack.’”

[The Guardian \(UK\)](#) (6/8, Hern, Sabbagh) reports the outage “should act as a ‘wake-up call’ that internet infrastructure has become dangerously over-centralised and lacks resilience, security experts have warned.”

CUPHD - Julie Pryde

■..... Now in Phase V

■..... Anything we can do to get more people vaccinated is appreciated.

■..... Partnering with others and doing different things every day to encourage vaccinations with incentives; 26 were vaccinated at Sholem Pool

■..... Wrote a grant to get a new mobile unit with refrigeration in anticipation of booster shots down the road (current is 15 years old)

■..... Vaccine for children under 12 should be ready before fall

■..... Unvaccinated people tend to cluster and will continue to have outbreaks; **have maps by neighborhoods(see attached)** and will survey why not and provide information and ask what incentives will help; there will be door to door outreach and vaccination clinics

■..... Guatemalan Consulate will be at CUPHD on 6/26 and there will be a vaccination clinic

|

CCEMA – John Dwyer & Collin Rector

■..... Still testing four days/week at Marketplace Mall – 80-100 each day; Mall is interested in doing vaccinations as well

■..... Let John know of large events and they can alert contact for the event of impending inclement weather

■..... Meeting with Public Health, Carle and OSF to circulate supplies from the State in case of outbreak in the fall

■..... **EMA is hosting a training session with Association of Fire Chiefs on 7/22 – first time in Illinois; would like community leaders to attend**

UIUC – Bob Flider, Laura Frerichs, Laura Bleill, & Jodi Silotto

- UIUC Mass Mail update went out on 6/11 reiterating Phase V guidelines
- Faculty and Staff must wear masks in classrooms
- Saliva testing requirement for faculty, staff and students – working on guidelines for not taking the test if vaccinated
- Sporting events will be open
- New UIRP campaign promoting to tech sector encouraging locating in Champaign and that the workforce is here. [Ads are here.](#)

City of Champaign – Bruce Knight & TJ Blakeman

- This weekend made efforts to tamp down issues in downtown. It was a quiet weekend.

Urbana – Mayor Marlin & Andrea Ruedi

- CURES ES FINAL - there were 23 CURES ES eligible applications requesting \$333,772.33. ½ will be paid this week and the other ½ during the last week of June
- Installation on the final two Curbanas starts today.

Rantoul – Mayor Charles Smith & Scott Eisenhauer

- Crime rate has picked up. Alerting public of areas. [License Plate readers have been purchased to identify cars seen in areas where crime has been committed.](#)
- 85 teams coming to the Rantoul Sports Complex this week
- 7/3 Independence Day Celebration

Savoy – Christopher Walton

■ No update

Senator Bennet's Office – Rachel Spencer

■ Back in session today working on

■ Working on summer events calendar – would like info on festivals

Mahomet – Pat Brown

■ Not present

Downtown Champaign Partnership – Zander Hazel

■ No Update

EDC & SBDC – Carly McCrory McKay & Don Elmore

■ 6/17, Vaccination Lottery discussion

■ People are inquiring about long waits on program funding – let Don know and he can provide information

■ Boneyard Arts Festival this weekend!

Visit Champaign County – Jayne DeLuce & Terri Reifsteck

- Full steam ahead working on events, RFPs – feels almost normal
- Toast of Tourism on 7/28.
- Will print Visitors Guide this year

Community Foundation - Joan Dixon

■ Met with 50 people from Not-for-Profits – only one not vaccinated but getting this week

Champaign County Chamber of Commerce – Madeline Herman

■ No update

RPC – Dalitso Sulamayo & Kathy Larson

■ Community Services Division continues to gather [community needs information](#)

■ Partnering with MTD with vaccination campaign; Dalitso is on MTD bus signage encouraging vaccinations (see attached).

Champaign County – Darlene Kloeppel

■ Not present

Black Chamber - Will Kyles

■ Not present

New American Welcome Center at University YMCA – Gloria Yen

■ No update

United Way – Sue Grey & Salvo Rodriguez

■ Not present

Subject: Portland PD unit's mass resignation memo cites 'extreme liability'

*** Email From An External Source ***

June 21, 2021

[View as webpage](#)

Dear Police1 Member,

If you believe data breaches, cyberattacks and ransomware are not areas of risk for law enforcement, think again. Here are some recent headlines that show public safety is as vulnerable to cybercrime as the private sector:

- 'BlueLeaks' exposes files from hundreds of US police departments
- DC police department hit by apparent extortion attack
- NYC's law department targeted by cyberattack

[Join a panel of experts](#) on June 24 for an interactive discussion, sponsored by Tyler Technologies, on cyberattack risks and preparation. Panelists will discuss recent cyberattacks and threats on public safety agencies and detail how your agency can develop a defensive strategy for these unprecedented attacks. [Register here](#).

Stay safe,

Digital Media Forensics & Officer-Involved Shootings: Scientific Accuracy in the Age of Trial by Media

When a critical incident occurs, most law enforcement agencies do not have the resources, staff, and training to perform in-depth analysis on the digital evidence associated with each case. And yet, these pieces of digital evidence can end up in the media to be tried by the court of public opinion.

Subject: The Retreat Apartments

I meant to send this out a few days ago but I got busy.

For those that don't know, The Retreat apartments, in addition to pretty decent video footage, have license plate readers at their gate. The readers also have night vision which will pick up license plates at night. If your ever investigating anything there, the manager (Logan Graves) and his staff are easy to work with and happy to help us with what ever the police need. His contact is listed below.

I had RPD Sgt. Schmidt run ██████████'s plate through their LPR/Flock system and these were the results.

Not great for this case, but I was quite impressed with the amount of detail in the daylight picture.

Might be worthwhile for future cases.....

We have your truck on Flock cameras three times. The only camera that its hitting on is on located on ██████████
██████████ These images capture him traveling ██████████. I would guess if we had our cameras ██████████
we have images there also but we are still waiting on IDOT approval to have those hung up. I attached the images
that we have.

Let me know if you need anything else for this.

Thanks

Jim

Subject: [REDACTED] Stop and Hold

I am looking to interview [REDACTED] reference U21-2228 (Home Invasion and Aggravated Criminal Sexual Assault). He drives a black 2016 Ford F150 crew cab, Illinois lic/[REDACTED]. He is back and forth between [REDACTED] and [REDACTED], as well as who knows where else.

On 07/08/2021 approximately 0200 hrs., a subject entered [REDACTED], sexually assaulted the resident and fled. Her description of the offender fits [REDACTED]'s description, [REDACTED] has been seen in this area and is reported to sometimes stay in the apartment's behind the victim, in addition to his past and possible ties to the sexual abuse cases on campus. If [REDACTED] is found driving his vehicle, his driver's license is suspended. Please pull him over and hold him and contact me (as the primary) or Detective Coleman (if he is available). If contact is made after hours, contact Lt. Smysor or Sgt. McNaught. If he is seen walking about, there is cause to stop and hold him still based on this case. Please do so and again, contact me. Items of interests are his shoes, possibly wearing Nike Airforce Ones, or similar tread pattern and his cell phone.

10-0, The victim from this morning stated the **OFFENDER** held a HANGUN to her head.

2016 Ford F150

License [REDACTED]

Subject: University of Illinois/Flock Safety Meeting Tuesday

*** Email From An External Source ***

Chief,

Good Morning, I know you told me that Urbana was not in position to look at LPR's a couple of months ago, but it would be a dereliction of duty as a sales rep to not let the police chief know when we are having a meeting in your back yard. I'm not sure if you saw, but last week Rantoul used Flock to identify the shooter in their mass shooting on the Fourth of July. After that incident Deputy Chief Robbin reached out to learn more about Flock. I am coming down there tomorrow to do a demo for her and her team at 3:30. My understanding is they are looking at putting some of the cameras off campus. Would you or anyone else from your team like to join?

Regards,

Subject: ED Leaders Meeting Highlights - 7/13 see Yellow for high priority and time sensitive items

CUPHD - Julie Pryde

- 2 confirmed Delta variant cases in Champaign County; Prediction that fall will see an explosion of the infection for the unvaccinated
- Currently 72 COVID cases and 2 hospitalized
- Applied for \$250k grant for new mobile unit with refrigeration to be used for Immigrant Cooperative as a "vaccination mobile"
- Under 12 vaccine won't be available until late Sept/early Oct.; vaccination clinics in schools will begin immediately; [Guidance for COVID-19 Prevention in K-12 Schools | CDC](#)
- Champaign County Fair will not agree to having a vaccination clinic

CCEMA – John Dwyer & Collin Rector

- 147,981 have been tested at Marketplace Mall
- Tornado touched down yesterday near Fisher, no one injured
- New siren system worked when tested in late June
- Helping out in McLean County with storm sewer back up – opening a resource center to provide relief as it is not covered by insurance (collapsing walls, 3' of water in basements, etc.)
- July is Financial Preparedness Month

UIUC – Bob Flider, Laura Frerichs, Laura Bleill, & Jodi Silotto

■ Working on SHIELD CU initiative – Parkland and State Farm Center (then shifting to CERCI and Illini Union)

■ Messaging for uploading vaccination cards to McKinley Health

■ UIRP recruiting companies

■ UIRP working with companies to identify local jobs for students

Parkland – Stephanie Stuart

■ SHIELD testing in place Monday, Wednesday and Saturdays

■ Postcard to all area households on funding available for students

RPC – Dalitso Sulamayo & Kathy Larson

- Providing utility and water assistance through Federal funding

City of Champaign – Bruce Knight & TJ Blakeman

■ Gearing up for public input on American Rescue Plan monies – community listening sessions, block parties, website, survey on ipads, study session on 4th floor of Illinois Terminal with stations on areas of interest

■ Working with Mariah Madison – black market once/week in August

Urbana – Mayor Marlin & Andrea Ruedi

■ Hotel Royer announced and construction underway

■ Press coverage on Stonecreek Golf Club improvements – building permits have increased

■ New businesses opening in Urbana: Reg Cakes, Arts & Pastries, TheGlitterBox, Cloud Mountain, La Michoacana, Gather Project, Hunny Bunny Bakes, Asan Tea

Rantoul – Mayor Charles Smith & Scott Eisenhauer

■ Board meeting tonight – Horve Hospitality will present - start construction in August

■ Vision for downtown Rantoul to make more vibrant

■ Illinois automated track – land purchase to be completed in 45 days

■ Shootings on July 4th – license plate readers enabled tracking down of vehicle and witness came forward and all but one apprehended

Savoy – Christopher Walton

■ Introduced Katie Simpson, new Community & Economic Development Director

Senator Bennet's Office – Rachel Spencer

■ Will see if Senator Bennet can assist with a vaccination clinic at the Champaign County Fair

Mahomet – Pat Brown

■ Musical Festival, Friday 8/27-28, will have a vaccine clinic

■ Car show this past weekend, not a great turnout

Downtown Champaign Partnership – Zander Hazel

■ No update

EDC & SBDC – Carly McCrory McKay & Don Elmore

■ Working on Champaign County Vaccine Lottery sponsor benefits; Lottery will take place in August; T-shirts will be printed that will be sold to the public

■ Receiving Community Navigation Grant to support small businesses in obtaining State and Federal loan programs

Visit Champaign County – Jayne DeLuce & Terri Reifsteck

■ Annual Toast of Tourism – 7/28

<https://www.visitchampaigncounty.org/about-us/toast-to-tourism>

■ Junior Am at the AJGA at Urbana County Club on 7/19 in conjunction with American Junior Golf Assn. tournament at Urbana County Club, 7/19 – 7/22

Community Foundation – Angie Hatfield

■ Angie's first meeting as new CEO of the Foundation - no update

United Way – Sue Grey & Salvo Rodriguez

■ UW Board approved \$10k to support CUJ SHIELD marketing

Champaign County Chamber of Commerce – Laura Weis

■ Will host another job fair in September at the I Hotel

■ Returning to in person events; other Chambers have reported low turnouts at recent in-person events

New American Welcome Center at University YMCA – Gloria Yen

- Not present

Champaign County – Darlene Kloeppel

■■■■■■■■ Not present

Black Chamber - Will Kyles

*** Email From An External Source ***

Corey,

Motorola will be hosting a lunch and learn. Please plan on joining our general session from 10:30-1:00pm in Champaign at the Hilton Garden Inn on Neil Street. Please invite your Mayor, City Council and other decision makers for your department's budget. If you would like to schedule an hour for a private meeting, please let me know as soon as you can. Grant Assistance programs and Safer Communities will be discussion topics.

Motorola Product Specialists will be presenting the various Motorola video solutions at the Champaign Hilton Garden on August 5th from 10:30A-1:00P. This will be a lunch and learn session. We will have three different subject matter speakers.

1. Avigilon (Fixed) - Chris Moomey
2. Watchguard (In Car and On Body) - Danny O'Shea
3. Vigilant (License Plate Recognition) - Sam Baldasano

The Motorola Eco System is a powerful tool for any community small or large. Safer Communities are the Goal.

FBI To Consider Upgrading Criminal Background Checks To Prevent Sale Of Guns To Underage, Out-Of-State

[CNN](#) (7/16, Carrega) reports, "The FBI has agreed to consider modifying its criminal background check system after the Justice Department's inspector general found the system did not cross check the buyer's age with legal requirements of their home state, according to a report released on Thursday." CNN adds, "Under federal law, customers are not allowed to buy firearms, specifically a rifle or a shotgun, in a jurisdiction that is different from the address listed on their identification unless the customer's age is legal in both the state of sale and where the person lives, according to the report. The findings stem from an Office of Inspector General's audit that was launched, in part, after Colorado lawmakers asked the agency to probe the National Instant Criminal Background Check System (NICS), which is used by licensed federal firearms sellers and other retailers, after an 18-year-old purchased a shotgun in Colorado even though she was a resident in Florida, which prohibits the sale of firearms to anyone under 21."

Some Law Enforcement Criticize Laws To Make Pre-Trial Releases Less Difficult

The [Wall Street Journal](#) (7/16, Subscription Publication) says a number of states have approved laws to make it less difficult for accused offenders to be released prior to their trials. The Journal adds that Chicago is the most recent municipality in which law enforcement have criticized laws of this nature for playing a part in violent crime.

NYTimes Analysis NYC Statistics Indicate City Still Struggling To Prosecute Rape Cases

In a more than 3,000-word article, the [New York Times](#) (7/18, Ransom) reports that while the "Me Too" movement "led to heightened awareness of the prevalence of sexual assault, an increase in reports to police, and a new hope that people accused would be more frequently held accountable," New York City statistics "and the accounts of women who say they were attacked suggest that little has changed about the way the criminal justice system grapples with rape accusations." According to the Times, "Most New York City prosecutors' offices rejected a greater percentage of sex crime cases in 2019, the last year for which reliable data is available, than they did roughly a decade earlier, before the case against Harvey Weinstein touched off a national reckoning." The Times adds the "low prosecution rate" in Manhattan and the Bronx "partly reflects the inherent challenges of prosecuting sexual assault," but "some" claim it "also reflects prosecutors' unwillingness to tackle those challenges."

Atlanta Mayor Proposes \$70M Plan To Reduce Violent Crime

The [AP](#) (7/16) reports, "Atlanta's mayor is proposing a \$70 million effort to reduce violent crime in the city, including hiring 250 more police officers, working to alter violent behavior and tracking repeat offenders to make sure they're convicted." Mayor Keisha Lance Bottoms on Friday "also proposed installing 10,000 more streetlights, cracking down on illegal after-hours clubs, and adding 250 license plate reader cameras. The Atlanta City Council would have to approve the spending." Bottoms "said those are the recommendations of her Anti-Violence Advisory Council. The mayor had announced some of the plans previously in March. Bottoms wants the effort to be coordinated by a new office of violence reduction in the mayor's office. She said the crime prevention office would coordinate efforts across multiple departments."

Yakima, Washington Police To Renew Focus On Data-Driven Policing

The [Yakima \(WA\) Herald-Republic](#) (7/18, Foster) reports, "The Yakima City Council agreed to invest in 15 automatic license plate recognition cameras and hire two new crime analysts earlier this month, as the Yakima Police Department shifts toward a data-driven approach to eliminate violent crime and gang violence. 'Communication is the biggest issue,' Capt. Shawn Boyle said the July 6 City Council meeting. '(An analyst) is going to be the link to communicate from the detective division to the administration to the officers and we'll see a lot better flow of information between all the departments in the organization.' Ten of the cameras will be permanently placed at entry points to the city of Yakima and five will be used in high-crime areas. The exact locations will be determined by the analysts." The department "will use data analysis to provide direction for determining things like what time should officers' shifts start, where policing district boundaries should go for police cars or how many cars should be staffed on different days of the week, said Chief Matt Murray."

Drug Investigation Leads To Charges For 22 People

[Insauga \(CAN\)](#) (7/16, Pereira) reported that 22 people are "facing serious charges" in connection with a Canada drug trafficking investigation. The investigation was conducted by several law enforcement organizations based in that country and the DEA.

Security, Crime, and Drugs

Arizona Man Charged With Threatening Governor, Secretary Of State

[KTVK-TV](#) Phoenix (7/16, Palacios Perez) reports, "A Phoenix man on the FBI's Terrorist Watchlist was arrested on Wednesday after he threatened Arizona Governor Doug Ducey and Secretary of State Katie Hobbs." KTVK-TV adds, "According to court documents, on July 1, 26-year-old Laquint Cherry posted on Twitter under an alias account a statement threatening the lives of Ducey and Hobbs. His message read in part: 'Doug Ducey, Katie Hobbs wanna join Jesus in heaven?' Cherry also included hashtags, tagging ISIS and the Islamic State. In the post, Cherry included a photo of himself holding a loaded gun with an extended magazine in his left hand, documents state. The social media company flagged the post, but investigators had to track down the person behind the alias account."

Three Men Arrested Near All-Star Game Face Federal Gun Charges

The [AP](#) (7/16, Slevin) reports from Denver, "Three men arrested with more than a dozen weapons and hundreds of rounds of ammunition at a Denver hotel near the site of Major League Baseball's All-Star Game have been charged with federal firearms crimes, the U.S. Attorney's Office said Friday." The AP adds, "The number of weapons found May 9 near the event and a request by one of the men for a room with a balcony raised concerns among police of a possible mass shooting but the FBI soon said it had no reason to believe the arrests were connected to terrorism or that there was a threat to the game. Federal prosecutors reiterated that in announcing that Richard Platt, Ricardo Rodriguez and Gabriel Rodriguez had each been charged with being a felon in possession of a firearm. Each has multiple previous felony convictions, according to court documents. Gabriel Rodriguez is also charged with possession with intent to distribute methamphetamine."

Nationals Park Reopens After Nearby Shooting

The [Washington Post](#) (7/18) reports hours after "a burst of gunshots outside Nationals Park" on Saturday disrupted the game between the San Diego Padres and Washington Nationals, "unaware, in that moment, that the incident took place on South Capitol Street and there wasn't an active shooter situation in the stadium." the teams "returned Sunday morning to play a baseball game. Fans showed up, too, in small pockets around a park that fits more than 41,000." To the Post, "It was normal except that, in the lead-up to first pitch at 1:08 p.m. for the resumption of a contest that stopped amid nearby gunfire in the sixth inning, all people discussed was their version of the previous night."

Meanwhile, the [Wall Street Journal](#) (7/18, Day, Subscription Publication) says that the shooting outside the ballpark and a separate one that left a six-year-old girl dead this weekend have highlighted the increase in gun crime in DC and in other US cities.

Arizona Sex Crime Operation Nets 40 Arrests

[Fox News](#) (7/16, Aitken) reports, "Arizona authorities arrested 40 men in connection to child sex crimes as part of an inter-agency operation called 'Behind the Mask,' officials said Tuesday." The men, "ranging between 20 and 64 years old, were arrested on suspicion of charges that included luring a minor for sexual exploitation, aggravated luring a minor for sexual exploitation, child sex trafficking and attempted sexual conduct with a minor. The operation was the result of a partnership involving the Tempe Police Department, Homeland Security, the FBI and the Attorney General's office, as well as Phoenix, Mesa and Scottsdale police. "Throughout the operational period, undercover detectives placed ads on websites commonly sought out by suspects seeking illegal sex acts," police told Fox 10 Phoenix. "The suspects reportedly solicited and/or brokered deals for various sex acts and were subsequently arrested."

New York City Deputies Seize 43 Vehicles For Fake Paper License Plates

The [New York Post](#) (7/16, Martinka, Marino, Woods) reports, "Deputy sheriffs seized 43 vehicles with bogus paper license plates on Brooklyn streets during an overnight crackdown on Friday, officials said. The operation began at midnight and ran through 6 a.m. — spanning the 69th, 63rd and 67th Precincts, which include neighborhoods such as Canarsie, Flatbush and Mill Basin." Deputies "used license plate reader technology to identify some of the offending vehicles, according to NYC Sheriff Joseph Fucito. The sheriffs will probe who really owns the cars, Fucito said. 'Once we discover the true owner, then the true owner will get noticed,' he exclusively told The Post during the operation. 'And then the true owner will have to come in and show that their vehicle is properly registered.' The NYC sheriff's operation 'CON-Temporary' seized almost 50 vehicles with fake paper plates in a few hours, most coming from the Canarsie area."

More Than 93,000 People In US Died From A Drug Overdose Last Year

In online coverage, [CNN](#) (7/17, Braner) reported, "More than 93,000 people died from a drug overdose last year" in the US, "according to provisional data" that the Centers for Disease Control and Prevention (CDC) recently released.

FBI To Consider Upgrading Criminal Background Checks To Prevent Sale Of Guns To Underage, Out-Of-State

[CNN](#) (7/16, Carrega) reports, "The FBI has agreed to consider modifying its criminal background check system after the Justice Department's inspector general found the system did not cross check the buyer's age with legal requirements of their home state, according to a report released on Thursday." CNN adds, "Under federal law, customers are not allowed to buy firearms, specifically a rifle or a shotgun, in a jurisdiction that is different from the address listed on their identification unless the customer's age is legal in both the state of sale and where the person lives, according to the report. The findings stem from an Office of Inspector General's audit that was launched, in part, after Colorado lawmakers asked the agency to probe the National Instant Criminal Background Check System (NICS), which is used by licensed federal firearms sellers and other retailers, after an 18-year-old purchased a shotgun in Colorado even though she was a resident in Florida, which prohibits the sale of firearms to anyone under 21."

Some Law Enforcement Criticize Laws To Make Pre-Trial Releases Less Difficult

The [Wall Street Journal](#) (7/16, Subscription Publication) says a number of states have approved laws to make it less difficult for accused offenders to be released prior to their trials. The Journal adds that Chicago is the most recent municipality in which law enforcement have criticized laws of this nature for playing a part in violent crime.

NYTimes Analysis NYC Statistics Indicate City Still Struggling To Prosecute Rape Cases

In a more than 3,000-word article, the [New York Times](#) (7/18, Ransom) reports that while the "Me Too" movement "led to heightened awareness of the prevalence of sexual assault, an increase in reports to police, and a new hope that people accused would be more frequently held accountable," New York City statistics "and the accounts of women who say they were attacked suggest that little has changed about the way the criminal justice system grapples with rape accusations." According to the Times, "Most New York City prosecutors' offices rejected a greater percentage of sex crime cases in 2019, the last year for which reliable data is available, than they did roughly a decade earlier, before the case against Harvey Weinstein touched off a national reckoning." The Times adds the "low prosecution rate" in Manhattan and the Bronx "partly reflects the inherent challenges of prosecuting sexual assault," but "some" claim it "also reflects prosecutors' unwillingness to tackle those challenges."

Atlanta Mayor Proposes \$70M Plan To Reduce Violent Crime

The [AP](#) (7/16) reports, "Atlanta's mayor is proposing a \$70 million effort to reduce violent crime in the city, including hiring 250 more police officers, working to alter violent behavior and tracking repeat offenders to make sure they're convicted." Mayor Keisha Lance Bottoms on Friday "also proposed installing 10,000 more streetlights, cracking down on illegal after-hours clubs, and adding 250 license plate reader cameras. The Atlanta City Council would have to approve the spending." Bottoms "said those are the recommendations of her Anti-Violence Advisory Council. The mayor had announced some of the plans previously in March. Bottoms wants the effort to be coordinated by a new office of violence reduction in the mayor's office. She said the crime prevention office would coordinate efforts across multiple departments."

Yakima, Washington Police To Renew Focus On Data-Driven Policing

The [Yakima \(WA\) Herald-Republic](#) (7/18, Foster) reports, "The Yakima City Council agreed to invest in 15 automatic license plate recognition cameras and hire two new crime analysts earlier this month, as the Yakima Police Department shifts toward a data-driven approach to eliminate violent crime and gang violence. 'Communication is the biggest issue,' Capt. Shawn Boyle said the July 6 City Council meeting. '(An analyst) is going to be the link to communicate from the detective division to the administration to the officers and we'll see a lot better flow of information between all the departments in the organization.' Ten of the cameras will be permanently placed at entry points to the city of Yakima and five will be used in high-crime areas. The exact locations will be determined by the analysts." The department "will use data analysis to provide direction for determining things like what time should officers' shifts start, where policing district boundaries should go for police cars or how many cars should be staffed on different days of the week, said Chief Matt Murray."

Drug Investigation Leads To Charges For 22 People

[Insauga \(CAN\)](#) (7/16, Pereira) reported that 22 people are "facing serious charges" in connection with a Canada drug trafficking investigation. The investigation was conducted by several law enforcement organizations based in that country and the DEA.

*** Email From An External Source ***

Trinity Innovative Solutions Technology Trailer

(Shown with Optional Generator)

Our trailer is equipped with high quality LPR cameras and software & high-performance edge- computing resources. The **Technology Trailer is capable of processing high volumes of plate reads with remarkable accuracy and quick notifications.**

Industry leading license plate recognition (LPR) technology is presented in one mobile traffic enforcement and investigative trailer. Built to withstand extreme weather, the Trinity Technology Trailer is dependable, robust, and backed by our matchless warranty.

(Shown with Optional Generator)

What Makes Our Design Notable?

- Dual LPR Camera Capable (Articulated Mount)
- Features an All-Steel Frame
- Aluminum Equipment, Battery, & Camera Boxes
- 3 x 160w Solar Panels
- 3 x 12-Volt, 150 Ah Batteries
- Active & Passive GPS
- Easy Transportation & Deployment
- Remote Management with System Alerts
- On Board Cord Reel
- Enclosed Electrical Cables for Added Protection
- Standard 12-Month Warranty with Extended Warranties and/or Maintenance Plans Available

For More Information, Visit Our Website

What Makes Us Notable?

Trinity Innovative Solutions supports law enforcement and public safety agencies both domestically and internationally. Our innovative designs solve problems unique to law enforcement. We are experienced, capable, and committed to our customers. We expect much from ourselves and promise that we will give all that we have while creating solutions for your problems.

We've reopened registration for Command Academy 2021!

This annual conference has become THE premier law enforcement training and networking event dedicated to command leaders. Join us on October 26-29, 2021 at Cheyenne Mountain Conference, Colorado Springs, CO.

Agencies from 10 states have already registered. Don't miss out on this high value/low cost police leadership conference (all meals and entertainment included with \$395 registration fee).

The 2021 Keynote Speakers are the renowned Drs. Roberto and Rachel Santos of the Center for Police Practice, Policy, and Research at Radford University. They will lead a 2-day workshop on operationalizing crime reduction across and up/down your agency. In addition, CID speakers will share best practices with License Plate Reader technology and Professional Standards speakers will address Police Reform and Use of Force.

Dr. Rachel Santos

Dr. Roberto Santos

Space is limited to first-come, first-serve. Register here. Join us on October 26-29, 2021 at Cheyenne Mountain Conference, Colorado Springs, CO.

Brian McGrew

Subject: Protect your city with Rekor One™

*** Email From An External Source ***

Dear Chief Seraphin,

I'm reaching out to you because I wanted to invite you to join cities like [Albany, NY](#); [Mt Juliet, TN](#); [Lauderhill, FL](#) and others by taking advantage of a special opportunity to have Rekor One™ installed in your city today... **with no capital investment needed**. Rekor One is our real-time roadway intelligence platform that provides **actionable public safety data** (LPR with NCIC hot listing, wanted vehicles, amber alerts, etc.) alongside easy-to-use investigative toolsets.

State-of-the-art LPR

\$100 a Month per Camera*

NO hardware investment, NO long-term contract, NO maintenance.

For **\$100 a month per camera***, Rekor will install our state-of-the-art Edge Series Cameras to capture roadway and vehicle information and provide you with Rekor One public safety data to improve community safety.

Take a look at one of our [Sample Agreements](#)

[Review contract](#)

We believe that the roadways are the backbone of a city, and that law enforcement and public safety are a cornerstone for driving towards smart cities and intelligent roadways. We're able to provide this offer to you because the same hardware we will deploy also captures de-identified data that Rekor One transforms into useful analytics and live traffic views for Departments of Transportations and Departments of Public Works.

*\$100 per month per installed camera. Fee includes installation services by Rekor, and department access to the Rekor One Public Safety platform information powered by [Rekor Scout™](#). Customer must agree to participate in Rekor Public Safety Network and sharing de-identified data with Rekor. Minimum of 10 camera deployment and 1-year term required.

Let's Protect Your City, Together.

[Contact us to get started](#)

[Contact us](#) to take advantage of this limited time opportunity to equip your community with Rekor One™.

Look forward to connecting and letting us serve you,

Mike Dunbar

Chief Revenue Officer

*** Email From An External Source ***

Hi Chief Seraphin

I have been meeting with several departments in your area over last couple months about License plate readers and several cities in your area are seeing a ton of success identifying stolen vehicles and stopping the offenders before they commit crimes.

Long story short - we make LPR Cameras that are:

- Solar and Cell powered (stationary - put them anywhere)
- Smart (they scan the entire vehicle using AI getting make/model/color/plate/temp plate/no plate... ext.)
- **Affordable (\$2,500 all-in)**

I included a case study of a department around your size who saw a 70% drop in crime after utilizing Flock for 1 year.

Are you available early next week for a quick call to learn more as well as tell you a bit about what Flock is doing for other departments?

Dan Murdock

*** Email From An External Source ***

Chief,

Good Morning, I know you told me that Urbana was not in position to look at LPR's a couple of months ago, but it would be a dereliction of duty as a sales rep to not let the police chief know when we are having a meeting in your back yard. I'm not sure if you saw, but last week Rantoul used Flock to identify the shooter in their mass shooting on the Fourth of July. After that incident Deputy Chief Robbin reached out to learn more about Flock. I am coming down there tomorrow to do a demo for her and her team at 3:30. My understanding is they are looking at putting some of the cameras off campus. Would you or anyone else from your team like to join?

Regards,

--

Good afternoon, I would like to invite the three of you to a meeting if you can make it on Friday at 1:30 pm at UIPD.

The University is purchasing 5 LPR's for the campus. Rantoul PD has over 30 cameras, Champaign is looking at buying 20-25 cameras, and Urbana is thinking about it. This is just another way/tool to use in our fight against gun violence.

Dan Murdock from Flock Safety is going to do a 45 min demo to our legal department. We will have three people. But knowing that Champaign and Urbana are looking at the LPR's, I wanted to invite you over since we have a small crowd no law enforcement in this meeting to get an understanding of what the LPR's can do for your communities.

We will meet in the second floor training room.

I hope you can join us. Barb

Barb - Thank you very much for the offer to meet. Unfortunately, both Mayor Feinen and I are unavailable on Friday.

Our City is also exploring various technologies including LPRs, with our Police Department taking the lead. We typically do not include our elected officials during the initial stages of the purchasing process since our Mayor and City Council will likely have to take action in an open meeting if we enter into a contract for service or make a technology purchase. We also discourage meetings with individual vendors outside of the purchasing process so as not to "taint" the process or give the impression that our procurement process is not fair and compliant with state and local ordinances - you will note that I have removed the Flock representative from my response to your email for this reason.

The City of Champaign is open to collaborating with our partner agencies across the County, including UIPD and the City of Urbana, as we consider these technologies. I would respectfully request that you work through CPD leadership in the future for setting up any conversations with staff about this. I have copied Interim Chief Matt Henson on this email reply so he is aware of your offer to jointly explore this.

Thank you again for reaching out - we absolutely have to move forward as one community in our fight against gun violence and greatly appreciate UIPD's partnership in keeping our community safe.

Barb - Thank you very much for the offer to meet. Unfortunately, both Mayor Feinen and I are unavailable on Friday.

Our City is also exploring various technologies including LPRs, with our Police Department taking the lead. We typically do not include our elected officials during the initial stages of the purchasing process since our Mayor and City Council will likely have to take action in an open meeting if we enter into a contract for service or make a technology purchase. We also discourage meetings with individual vendors outside of the purchasing process so as not to "taint" the process or give the impression that our procurement process is not fair and compliant with state and local ordinances - you will note that I have removed the Flock representative from my response to your email for this reason.

The City of Champaign is open to collaborating with our partner agencies across the County, including UIPD and the City of Urbana, as we consider these technologies. I would respectfully request that you work through CPD leadership in the future for setting up any conversations with staff about this. I have copied Interim Chief Matt Henson on this email reply so he is aware of your offer to jointly explore this.

Thank you again for reaching out - we absolutely have to move forward as one community in our fight against gun violence and greatly appreciate UIPD's partnership in keeping our community safe.

Good afternoon, I would like to invite the three of you to a meeting if you can make it on Friday at 1:30 pm at UIPD.

The University is purchasing 5 LPR's for the campus. Rantoul PD has over 30 cameras, Champaign is looking at buying 20-25 cameras, and Urbana is thinking about it. This is just another way/tool to use in our fight against gun violence.

Dan Murdock from Flock Safety is going to do a 45 min demo to our legal department. We will have three people. But knowing that Champaign and Urbana are looking at the LPR's, I wanted to invite you over since we have a small crowd no law enforcement in this meeting to get an understanding of what the LPR's can do for your communities.

We will meet in the second floor training room.

I hope you can join us. Barb

Good Morning,

Our team is excited to connect with law enforcement from across the country at the upcoming IACP Conference in New Orleans. Are you headed to the event or have a member from your department going? We're hosting a Happy Hour event at Rock 'N' Bowl and it'd be great to see you there!

Please feel free to forward this invite on to a member of your staff or a peer joining and we hope to connect with you in September. You can RSVP by [clicking here](#) or on the image below.

DC,

No problem. I am taking a four day weekend so I am going to be out of the office at the end of this week, but 9am Monday is perfect. I will send over a confirmation email and a webinar link. If you have any questions before then please let me know otherwise I look forward to meeting you then.

Regards,

?Mr. Murdock,

Apologies for the delay. My email system sent this message to my junk folder. I just now found it. I could do 9 AM on Monday. Unfortunately, 3 pm is not possible. Have a visitation and funeral on Monday and Tuesday afternoon. I am also available later this week if you are. If not, no worries.

DC,

Thank you for reaching out. I would suggest setting up a quick demo to jump in and take a look at what Flock has to offer. I am available later today if you are free, or we can set up time at 9 or 3 on Monday, or anytime Tuesday Afternoon.

Please let me know what works best for you.

Regards,

LIVE WEBINAR

PRODUCT LAUNCH EVENT

Axon will be joining Flock Safety's [quarterly product launch on Wednesday, September 1, 2021 at 1 PM EST / 10 AM PST](#) to discuss our disruptively affordable mobile and fixed ALPR partnership. Here's what you can expect at the event:

- Unveiling of an advanced evidence delivery package, including solutions for drug trafficking, motor vehicle theft and drive-by shooting investigations
- A live conversation with Axon's Director of Fleet Products, Blake Bullock, on fully-integrated fixed and mobile ALPR solutions for scalable, city-wide coverage with the new Fleet 3 in-car camera solution
- Inaugural #Solved Awards - [nominate a fellow officer here](#), and we will announce the winners (and prizes) during the event
- Flock Safety's biggest announcement to date - don't miss it!

Deputy Chief,

Thank you for your time today. I thought our conversation was very productive. I have included a proposal to this email along with some examples of LPR Policies & a screen shot of the SOS retention email. Basically the important things that set Flock apart from other LPR systems are 4 things.

1. We can deploy cameras without existing infrastructure, runs on solar with built in LTE.
2. Our cameras are much less expensive than traditional LPR's, so you get much more coverage. Only \$2,500 per Camera a year.
3. Free Sharing between departments. You can access your neighbors cameras just like your own if they allow you access. All for free.
4. We don't need a plate to get you a hit. We are capturing the whole car. Are you looking for a Silver Toyota car. We will show you all the Silver Toyota Cars in the area.

I would also like to introduce you to Rich. Once you get the heat maps together send them along and he will sit down and build out a map of 20 cameras for us to review.

Here is the exchange about 30 day retention.

Hi Steve,

Is it possible to schedule a quick call with you for a question on records retention of automatic license plate recognition (ALPR) images and data? If this isn't possible or if there's someone else who would be better to pose the question to, can you forward this email or reply with their contact information?

Thank you

Our cameras do not have LPR capabilities yet. They are designed to work that way - we just have not activated them.

We met with Flock in Chicago two weeks ago and may add a handful not their units depending on our new Chief (arrives Oct 1).

Sent from my mobile device.

Those cameras you mentioned that you put up with Public Works – were those LPR or just CCTV-like?

Do you have LPRs? Are you with Flock?

Thanks!

Texas Set To Become Largest US State To Enact “Constitutional Carry” Gun Law

The [Houston Chronicle](#) (8/30, Harris) reports, “Texas will soon become largest state so far to enact a ‘constitutional carry’ gun law,” but “Michael Sierra-Arévalo, an assistant professor at the University of Texas at Austin who has studied gun policy, said the most pertinent change in the law may be the elimination of the training mandate.” The Chronicle adds, “When Texas’ so-called ‘constitutional carry’ law takes effect this week, experts don’t expect to see an immediate increase in gun violence – but some suggest that crimes involving firearms may slowly creep up as more people carry them in public.” The law, “which takes effect Wednesday, will allow most Texans 21 and over to carry handguns, either openly or concealed, in public spaces without a license.” According to the Chronicle, “Twenty other states have adopted some form of permitless carry – Texas is by far the largest – but research on the impact of such laws is limited, and the findings are mixed.”

Officials: President Considering Clemency For Some Drug Offenders In Home Confinement

The [New York Times](#) (8/30, Kanno-Youngs, Savage) reports, “President Biden is considering using his clemency powers to commute the sentences of certain federal drug offenders released to home confinement during the pandemic rather than forcing them to return to prison after the pandemic emergency ends, according to officials” who are “familiar with internal deliberations” that have been held in connection with this matter. Interviews “with officials in both the executive branch and Congress, most of whom spoke on the condition of anonymity to discuss sensitive deliberations, suggest there is broad support for letting nonviolent inmates who have obeyed the rules stay at home.”

Ohio Ballot Board Approves Proposed Recreational Marijuana Legalization Statute

The [AP](#) (8/30) reports, “The Ohio Ballot Board...voted Monday to approve” a proposed recreational marijuana legalization statute. The approval allows the Coalition to Regulate Marijuana Like Alcohol, which proposed the statute, to “start gathering the nearly 133,000 valid signatures needed to submit the proposed state law to the Ohio Legislature.” If enough signatures are collected and the Ohio Legislature does not act on the coalition’s proposal within four months time, “the measure would be placed on the Ohio ballot.”

Law Enforcement Coordinates Crime Prevention Operation At Colorado State Fair

[KRDO-TV](#) Colorado Springs, CO (8/30) reports from Pueblo, Colorado, “Members of the Pueblo Police Department and agents from the FBI Denver Division conducted an operation to prevent crime near the Colorado State Fairgrounds, resulting in several arrests.” KRDO-TV adds, “Over the weekend of August 28-29, law enforcement conducted traffic stops and field contacts in that area. The operation resulted in: Four individuals were arrested on firearm-related charges: Two men and one juvenile male. Police say the three are known gang members, one was out on bond at the time of his arrest. One woman, a convicted felon who had two additional warrants for her arrest, was also in possession of Methamphetamine. One man taken into custody after Methamphetamine was discovered in his possession during a traffic stop. Four handguns were recovered.”

Conviction Integrity and Prevention of Wrongful Convictions

Forensic evidence is key information in efforts to ensure conviction integrity in cold and death penalty cases. It is also essential in efforts to prevent wrongful convictions. Through SAKI, the Enhancing Conviction Integrity through Forensics training series includes discussion panels, webinars, and briefs. Prosecutors and defense council can access knowledge and tools to understand and present forensic evidence in court.

FBI: Hate Crimes Hit 12-Year High In US In 2020

[Reuters](#) (8/30, Wolfe) reports, "The number of hate crimes in the United States rose last year to the highest level in more than a decade, driven by a rise in assaults targeting Black victims and victims of Asian descent, the FBI reported on Monday." The 2020 data, "submitted to the FBI by more than 15,000 law enforcement agencies across the country, identified 7,759 hate-crimes in 2020, a 6% increase over 2019 and the highest tally since 2008. The FBI data showed the number of offenses targeting Blacks rose to 2,755 from 1,930 and incidents against Asians jumped to 274 from 158." According to Reuters, "Of the 7,426 hate crime offenses classified as crimes against people, as opposed to crimes against property, 53.4% were for intimidation, 27.6% were for simple assault and 18.1% were for aggravated assault. Twenty-two murders and 19 rapes were reported as hate crimes."

The [Washington Post](#) (8/30, Nakamura) reports, "In all, the federal agency tallied 7,759 hate crimes last year, a tumultuous 12 months marked by a global pandemic, a divisive presidential election and upheaval in the economy. The total represented an increase of 6 percent from 2019 and the most since 2008, when 7,783 hate crimes were reported. It is the sixth time in the past seven years that the number of attacks rose. The number of hate crimes reported has increased by nearly 42 percent since 2014, according to federal data."

FBI: Texas Shooter Was Possibly Inspired By Foreign Terrorists

The [AP](#) (8/30) reports from Garland, Texas, "Investigators are looking into whether a Texas man was inspired by foreign terrorists when he killed a Lyft driver in a Dallas suburb and later opened fire in the police station of another suburb where officers fatally shot him." The AP adds, "Police said Imran Ali Rasheed ordered a Lyft in his home city of Garland Sunday then fatally shot the driver, Isabella Lewis. Her stolen car was found a short time later outside the police station in the neighboring community of Plano, where Rasheed began shooting in the lobby before being shot by officers, police chiefs in both cities said at a Monday news conference. Matthew DeSarno, special agent in charge of the FBI's Dallas office, said investigators believe Rasheed acted alone but that the 33-year-old left a letter indicating he 'may have been inspired by a foreign terrorist organization.'"

Police In Wales Break Up Illegal Rave In Mountains

[BBC News](#) (8/30) reports, "An illegal rave of up to 500 people has been shut down by police in the Brecon Beacons." BBC News adds, "Dyfed-Powys Police said revellers from as far as Essex and London attended the event in the Grwyne Fawr Valley, near Crickhowell, early on Sunday. Officers set up a road block following calls from local residents before entering the site later that morning. Three vehicles were recovered and controlled drugs seized, while barriers and gates had been damaged." According to BBC News, "Due to the darkness at the remote woodland location in the early hours, resources and a lack of radio signal in the area, police waited until later Sunday morning before moving onto the site," but "when they did, officers were met with hostility, abuse and threats by some of the estimated 300 people still on the site, police said."

Operation United Front Targeted Human Trafficking In 12 States

[KTIV-TV](#) Sioux City, IA (8/30, Welte) reports from South Sioux City, Nebraska, "Last week, law enforcement officers across 12 U.S. states conducted an operation with the intent of cracking down on human trafficking crimes. And one of the states involved was Nebraska." Operation United Front "took place Aug. 26 and 27, and resulted in 102 arrests and 47 victims identified. One of the participating agencies was the South Sioux City, Nebraska, Police Department. On Aug. 27, the SSCPD, along with several other law enforcement agencies, conducted an undercover human trafficking operation to identify victims and suspects of human trafficking and prostitution in the Siouxland area. The other law enforcement agencies that aided in the operations in Nebraska included OMFO FBI, HSI, Omaha Police Department, Sioux City Police Department, Nebraska State Patrol, Dakota County Sheriff's Office and the Nebraska Attorney General's Office."

Thirteen Injured In Bombing At Colombian Police Station

The [AP](#) (8/30) reports at least 13 people were "injured following an explosion at a police station near Colombia's border with Venezuela, officials in the city of Cucuta said on Monday." Police said the explosion was "caused by an 'improvised explosive device' that was left at the station, which is located in one of Cucuta's lower income neighborhoods." Authorities have not stated if they have determined who is behind the bombing.

Technology

Illinois State Police Installing License Plate Cameras On Chicago-Area Highways

The [AP](#) (8/30) reports from Chicago that Illinois state police "have begun installing license plate cameras on Chicago-area expressways to try to solve shootings. Attacks have been rising, with more than 150 so far this year, easily passing 128 in all of 2020, according to Illinois State Police. They 'are a challenge' to investigate, said Maj. Matt Gainer, investigative commander for the north region of Illinois. 'We don't have people sitting on the porches, we (can't) ring doorbells, we don't have neighborhoods that we need to canvas.' State police plan to install about 300 cameras across all Cook County interstates, said Gainer, adding that the images would be 'crystal clear.' 'You have the plate. That's key,' he said. 'That has a lot of value.'"

Texas Set To Become Largest US State To Enact “Constitutional Carry” Gun Law

The [Houston Chronicle](#) (8/30, Harris) reports, “Texas will soon become largest state so far to enact a ‘constitutional carry’ gun law,” but “Michael Sierra-Arévalo, an assistant professor at the University of Texas at Austin who has studied gun policy, said the most pertinent change in the law may be the elimination of the training mandate.” The Chronicle adds, “When Texas’ so-called ‘constitutional carry’ law takes effect this week, experts don’t expect to see an immediate increase in gun violence – but some suggest that crimes involving firearms may slowly creep up as more people carry them in public.” The law, “which takes effect Wednesday, will allow most Texans 21 and over to carry handguns, either openly or concealed, in public spaces without a license.” According to the Chronicle, “Twenty other states have adopted some form of permitless carry – Texas is by far the largest – but research on the impact of such laws is limited, and the findings are mixed.”

Officials: President Considering Clemency For Some Drug Offenders In Home Confinement

The [New York Times](#) (8/30, Kanno-Youngs, Savage) reports, “President Biden is considering using his clemency powers to commute the sentences of certain federal drug offenders released to home confinement during the pandemic rather than forcing them to return to prison after the pandemic emergency ends, according to officials” who are “familiar with internal deliberations” that have been held in connection with this matter. Interviews “with officials in both the executive branch and Congress, most of whom spoke on the condition of anonymity to discuss sensitive deliberations, suggest there is broad support for letting nonviolent inmates who have obeyed the rules stay at home.”

Ohio Ballot Board Approves Proposed Recreational Marijuana Legalization Statute

The [AP](#) (8/30) reports, “The Ohio Ballot Board...voted Monday to approve” a proposed recreational marijuana legalization statute. The approval allows the Coalition to Regulate Marijuana Like Alcohol, which proposed the statute, to “start gathering the nearly 133,000 valid signatures needed to submit the proposed state law to the Ohio Legislature.” If enough signatures are collected and the Ohio Legislature does not act on the coalition’s proposal within four months time, “the measure would be placed on the Ohio ballot.”

Law Enforcement Coordinates Crime Prevention Operation At Colorado State Fair

[KRDO-TV](#) Colorado Springs, CO (8/30) reports from Pueblo, Colorado, “Members of the Pueblo Police Department and agents from the FBI Denver Division conducted an operation to prevent crime near the Colorado State Fairgrounds, resulting in several arrests.” KRDO-TV adds, “Over the weekend of August 28-29, law enforcement conducted traffic stops and field contacts in that area. The operation resulted in: Four individuals were arrested on firearm-related charges: Two men and one juvenile male. Police say the three are known gang members, one was out on bond at the time of his arrest. One woman, a convicted felon who had two additional warrants for her arrest, was also in possession of Methamphetamine. One man taken into custody after Methamphetamine was discovered in his possession during a traffic stop. Four handguns were recovered.”

Conviction Integrity and Prevention of Wrongful Convictions

Forensic evidence is key information in efforts to ensure conviction integrity in cold and death penalty cases. It is also essential in efforts to prevent wrongful convictions. Through SAKI, the Enhancing Conviction Integrity through Forensics training series includes discussion panels, webinars, and briefs. Prosecutors and defense council can access knowledge and tools to understand and present forensic evidence in court.

FBI: Hate Crimes Hit 12-Year High In US In 2020

[Reuters](#) (8/30, Wolfe) reports, "The number of hate crimes in the United States rose last year to the highest level in more than a decade, driven by a rise in assaults targeting Black victims and victims of Asian descent, the FBI reported on Monday." The 2020 data, "submitted to the FBI by more than 15,000 law enforcement agencies across the country, identified 7,759 hate-crimes in 2020, a 6% increase over 2019 and the highest tally since 2008. The FBI data showed the number of offenses targeting Blacks rose to 2,755 from 1,930 and incidents against Asians jumped to 274 from 158." According to Reuters, "Of the 7,426 hate crime offenses classified as crimes against people, as opposed to crimes against property, 53.4% were for intimidation, 27.6% were for simple assault and 18.1% were for aggravated assault. Twenty-two murders and 19 rapes were reported as hate crimes."

The [Washington Post](#) (8/30, Nakamura) reports, "In all, the federal agency tallied 7,759 hate crimes last year, a tumultuous 12 months marked by a global pandemic, a divisive presidential election and upheaval in the economy. The total represented an increase of 6 percent from 2019 and the most since 2008, when 7,783 hate crimes were reported. It is the sixth time in the past seven years that the number of attacks rose. The number of hate crimes reported has increased by nearly 42 percent since 2014, according to federal data."

FBI: Texas Shooter Was Possibly Inspired By Foreign Terrorists

The [AP](#) (8/30) reports from Garland, Texas, "Investigators are looking into whether a Texas man was inspired by foreign terrorists when he killed a Lyft driver in a Dallas suburb and later opened fire in the police station of another suburb where officers fatally shot him." The AP adds, "Police said Imran Ali Rasheed ordered a Lyft in his home city of Garland Sunday then fatally shot the driver, Isabella Lewis. Her stolen car was found a short time later outside the police station in the neighboring community of Plano, where Rasheed began shooting in the lobby before being shot by officers, police chiefs in both cities said at a Monday news conference. Matthew DeSarno, special agent in charge of the FBI's Dallas office, said investigators believe Rasheed acted alone but that the 33-year-old left a letter indicating he 'may have been inspired by a foreign terrorist organization.'"

Police In Wales Break Up Illegal Rave In Mountains

[BBC News](#) (8/30) reports, "An illegal rave of up to 500 people has been shut down by police in the Brecon Beacons." BBC News adds, "Dyfed-Powys Police said revellers from as far as Essex and London attended the event in the Grwyne Fawr Valley, near Crickhowell, early on Sunday. Officers set up a road block following calls from local residents before entering the site later that morning. Three vehicles were recovered and controlled drugs seized, while barriers and gates had been damaged." According to BBC News, "Due to the darkness at the remote woodland location in the early hours, resources and a lack of radio signal in the area, police waited until later Sunday morning before moving onto the site," but "when they did, officers were met with hostility, abuse and threats by some of the estimated 300 people still on the site, police said."

Operation United Front Targeted Human Trafficking In 12 States

[KTIV-TV](#) Sioux City, IA (8/30, Welte) reports from South Sioux City, Nebraska, "Last week, law enforcement officers across 12 U.S. states conducted an operation with the intent of cracking down on human trafficking crimes. And one of the states involved was Nebraska." Operation United Front "took place Aug. 26 and 27, and resulted in 102 arrests and 47 victims identified. One of the participating agencies was the South Sioux City, Nebraska, Police Department. On Aug. 27, the SSCPD, along with several other law enforcement agencies, conducted an undercover human trafficking operation to identify victims and suspects of human trafficking and prostitution in the Siouxland area. The other law enforcement agencies that aided in the operations in Nebraska included OMFO FBI, HSI, Omaha Police Department, Sioux City Police Department, Nebraska State Patrol, Dakota County Sheriff's Office and the Nebraska Attorney General's Office."

Thirteen Injured In Bombing At Colombian Police Station

The [AP](#) (8/30) reports at least 13 people were "injured following an explosion at a police station near Colombia's border with Venezuela, officials in the city of Cucuta said on Monday." Police said the explosion was "caused by an 'improvised explosive device' that was left at the station, which is located in one of Cucuta's lower income neighborhoods." Authorities have not stated if they have determined who is behind the bombing.

SUPPORT FOR PARTICIPATION IN THE
National Use-of-Force Data Collection

[Learn more](#)

Minnesota Judge Promises To Rule Quickly In Review Of New Deadly Force Restrictions

The [AP](#) (8/31) reports that a Minnesota judge "has promised a ruling soon on whether to suspend Minnesota's new stricter standard on when police can use deadly force." The AP explains that the Minnesota Legislature "raised the bar on officers to justify in specific terms how their actions involving lethal force were necessary." Several police groups have sued "to get the law tossed out or at least suspended until more officers can be trained on the new expectations." On Monday, Judge Leonardo Castro "heard arguments...over whether officers have had enough time to adapt to the requirements, which took effect March 1."

Law Enforcement Organizations Partner With Faith & Blue In Largest Community Outreach Project In US History

[Fox News](#) (8/30, Pagonis) reports that major law enforcement organizations "at the international, federal, state and local levels are partnering with social change group Faith & Blue for its annual weekend of activities as part of the 'largest nationwide police-community initiative.'" Fox adds that leaders "from the National Faith & Blue Weekend announced Tuesday their plans to make history in partnering with 'every major national law enforcement' group in hosting its second-annual national event from Oct. 8 through Oct. 11."

Bill Enhancing Riot Penalties Heads To North Carolina Governor

The [AP](#) (8/31, Anderson) reports that legislation "cracking down on violent protests that critics argue could stifle free speech is heading to North Carolina's governor." The AP explains that the proposal from North Carolina House Speaker Tim Moore (R) "was fueled by rioting and looting he saw take place in Raleigh last year" during protests related to the death of George Floyd in Minneapolis police custody. The bill "passed the House on Tuesday by a vote of 63-41" and now goes to Gov. Roy Cooper (D), "who has previously expressed concerns with the measure."

New Mexico To Consider Bail Reform Amid Surge In Violent Crime

The [AP](#) (8/31, Gallagher) reports that while past "legislative efforts" to reform New Mexico's bail law by prosecutors and police groups "have fallen short," they now enjoy support from "an important ally" in Gov. Michelle Lujan Grisham (D), "who says she wants to see changes in the state's pretrial detention system." The AP explains that under the current system, "to have a defendant charged with a violent felony held prior to trial, prosecutors must show the accused represents a danger to the community – and that there are no conditions of release that will protect the community." However, Lujan Grisham "said she wants to shift the burden of proof so that people charged with violent offenses are required to show they can safely be released."

Hennepin County, Minnesota Embedding Social Workers In Police Agencies

The [AP](#) (8/31) reports from Minneapolis, Minnesota, "Hennepin County announced Tuesday that it plans to have social workers embedded in 21 police departments countywide by early 2022." The county "has been operating its embedded social worker program since 2019, and is adding seven new departments to its list of participating agencies. The social workers do not go out with police on 911 calls, but if there are concerns that someone is experiencing mental health or substance abuse issues, a responding officer can send a referral to a social worker, who then works on ways to get that person the resources and help they need." The AP adds, "The expansion comes as police departments nationwide are trying to find more effective ways to respond to calls involving people in crisis. The county says its program is part of a larger effort to improve emergency responses and divert people from the criminal justice system to hospitals or other services when appropriate."

Security, Crime, and Drugs

Reward Offered In Connection With Fentanyl Trafficking Investigation

The [AP](#) (8/31, Kolpack) reports the US State Department is offering a financial reward that could go as high as five million dollars "for information leading to the arrest or conviction of...Chinese national" Jian Zhang, who is "suspected of leading an international fentanyl trafficking operation." The overdose death of an 18-year-old in North Dakota prompted an investigation of that operation, according to the AP report.

Indiana Man Charged With Selling Fentanyl That Led To Overdose

The [Evansville \(IN\) Courier & Press](#) (8/31, Elias) reports, "Local officials are using recent arrests in connection with deadly drug overdoses to drive home the increasing severity of drug abuse in the community as fentanyl, a powerful opioid, becomes more prevalent." According to the Courier & Press, "At a Tuesday morning press conference, authorities announced the arrest of Todd D. Gardner, 25, on charges of dealing in a substance resulting in death for reportedly selling what police say was a fentanyl-laced pill that led to the fatal overdose of a man in April. Another man was arrested in a similar case last week. Gene Hoover, 44, was arrested and charged in connection with the Aug. 19 death of a man who reportedly bought heroin and fentanyl from Hoover the day he fatally overdosed. 'In dealing with these overdoses this year, has become evident that we're just going to destroy last year's numbers,' Vanderburgh County Coroner Steve Lockyear said."

Forty-Seven Indicted After Pennsylvania "Drug Pipeline" Dismantled

[KDKA-TV](#) Pittsburgh (8/31) reports nearly 50 people are "facing charges after authorities dismantled a drug pipeline from California to western Pennsylvania." Forty-seven people have been charged "with narcotics trafficking, money laundering and firearms violations in six separate" but related indictments after "Operation Return To Sender." The takedown was a joint effort "between multiple law enforcement agencies like the DEA, Homeland Security Investigations, state police and Pittsburgh Police."

WSJournal Analysis: Countering Terror Threats In Afghanistan Will Now Be Far More Difficult

A [Wall Street Journal](#) (8/31, Strobel, Lubold, Gordon, Subscription Publication) analysis states that while the President and his aides have said that the US can deal with terror threats in Afghanistan from "over the horizon," counterterrorism and intelligence officials say that it will be significantly harder and less effective than the White House has suggested.

Technology

Montana Law Enforcement Readies Tech For DUI Enforcement In Legal Marijuana Era

The [Missoula Current \(MT\)](#) (8/31, Valley) reports that the Montana Highway Patrol is "already gearing up" for new challenges in enforcing impaired driving laws when "the state's new recreational marijuana law" takes effect in January. The Current explains, "High tech machines at the Montana State Crime Lab in Missoula screen blood for a specific classification of drug, pinpoint what that drug is such as meth or opioids or marijuana. Another machine then measures the level of drug in a blood sample." The Current says the crime lab "in Missoula reports marijuana, meth and alcohol are the things most often popping up on DUI drug tests." The lab currently employs "eight full time toxicologists but asked the Montana Legislature for four more over the course of the next two fiscal years in perpetration an anticipated demand for testing."

*** Email From An External Source ***

Matt,

Yesterday, over 600 law enforcement agencies across the country joined us for our [quarterly product launch event](#).

Together, we celebrated our first-ever #Solved Award winners. We also released several new investigative tools for law enforcement to scale ALPR evidence capture and build stronger cases with less:

- Advanced Search Package
 - Transform any image (Ring doorbell, CCTV, mobile phone picture) into an investigative lead
 - Don't just apprehend one suspect, identify accomplice vehicles with a single search
 - No suspect vehicle? No problem. Enter crime timeframes and locations, Flock will find the plate you're looking for.
- MDT Hot List Application - Never miss a Hot List notification on the beat
- Axon's Fleet 3 integration with Flock Safety & more

Does any of this sound interesting to you? Let's connect. Hit "Reply" to this email, and we'll get a demo on the calendar.

Talk soon,

Maureen Mulvaney
Director, Product Marketing

Subject: RE: Flock Safety - Info/Intro
Attachments:  LPR Data Shots Fired 2021.pdf  Doc1.docx  LPR Data 083121.pdf

Rich,

Attached are a series of heat maps. Here is some context so you know what we are looking at.

1. The heat map called LPR Data 08/31/21 contains data related to calls for service from 2018-Jan. of 2021. We are struggling with calls for service data after Jan. 2021 because we went to a new CAD program. The calls for service that were searched include:

- 1) Shots fired
- 2) Armed Subject
- 3) Robbery
- 4) Shooting
- 5) Home invasion
- 6) Carjacking

We did exclude two hospitals from the data – Carle and OSF.

2. The next heat map, word doc called “Doc 1”, contains a heat map of those same calls for service where a report was taken. As you can see, there are some concentrations

3. The final heat map, LPR Data Shots Fired 2021, are from confirmed shooting events where we have some evidence of a shooting (multiple reporting person, shell casings, damage to property, injury, etc.). Red dots are 100 blocks with at least 3 shootings in the same block.

When you are ready to talk about less quantifiable information related to neighborhoods, traffic patterns, etc. just let me know.

We are not solid on the number of LPRs at this point. We could go lower. We could go higher. We would like to use 20 as an anchor to start the conversation however.

Subject: Flock Safety - Info/Intro

Deputy Chief,

Thank you for your time today. I thought our conversation was very productive. I have included a proposal to this email along with some examples of LPR Policies & a screen shot of the SOS retention email. Basically the important things that set Flock apart from other LPR systems are 4 things.

1. We can deploy cameras without existing infrastructure, runs on solar with built in LTE.
2. Our cameras are much less expensive than traditional LPR's, so you get much more coverage. Only \$2,500 per Camera a year.
3. Free Sharing between departments. You can access your neighbors cameras just like your own if they allow you access. All for free.
4. We don't need a plate to get you a hit. We are capturing the whole car. Are you looking for a Silver Toyota car. We will show you all the Silver Toyota Cars in the area.

I would also like to introduce you to Rich. Once you get the heat maps together send them along and he will sit down and build out a map of 20 cameras for us to review.

Here is the exchange about 30 day retention.

Hi Steve,

Is it possible to schedule a quick call with you for a question on records retention of automatic license plate recognition (ALPR) images and data? If this isn't possible or if there's someone else who would be better to pose the question to, can you forward this email or reply with their contact information?

Thank you!

Good morning,

Thank you for sharing the data. This is exactly what we need. I'll get a map put together with a solution that we think would work and share it with your team.

An In-Car Video Platform for the Future

[LEARN MORE](#)

The new M500 In-Car video system is the next step forward in in-car video technology. Designed to be much more than just a watchful eye, recording what it sees, the M500 is a brain, analyzing your surroundings and alerting you in real time to threats and objectives.

SCAN. ANALYZE. REACT.

The M500 is a powerful video analytics engine, designed not just to capture video evidence, but to keep you safer and more efficient in the moment.

License Plate Recognition

Know what's out there before you step out of the vehicle. Closely integrated with market-leading Vigilant LPR, the M500 can read license plates from up to 40 feet away.

New York Police Intel Strategies Employed After 9/11 Now Used To Fight Everyday Crime

[CNN](#) (9/11, Morales) reports, "In the aftermath of 9/11, New York City law enforcement officials developed a strategy designed to gain intelligence and develop technology to prevent any more attacks. Twenty years and hundreds of millions of dollars later, those same strategies and technological advancements are used to solve crimes." According to CNN, "The NYPD has made significant technological changes since the destruction of the World Trade Center, adding more cameras, installing license plate readers at points of entry as well as in police cars, and giving their officers smart phones that have access to records and information, officials said. These advances, among others, were developed using federal funding. Since 2017, the NYPD has spent over \$300 million each year on intelligence and counterterrorism, according to the city's independent budget office. The department's anti-terror tools also are being used to solve more run-of-the-mill crimes."

Six Los Angeles Police Department Employees Sue City Over Vaccination Mandate

The [Los Angeles Times](#) (9/12, Rector) reports that six Los Angeles Police Department employees "filed a federal lawsuit challenging the city's mandate that all L.A. employees be vaccinated against COVID-19." The lawsuit, "filed Saturday in U.S. District Court in Los Angeles, claims the mandate violates the employees' constitutional rights to privacy and due process, and asks the court to provide immediate and permanent relief from the requirement." The LAPD employees "suing include individuals 'who could not assert a medical or religious exemption' to the vaccine requirement, as well as individuals who have 'experienced and recovered from COVID-19' and have natural antibodies to fight the virus, the complaint states."

New York Governor Signs Law To Expand Pool Of First Responders

[Newsday \(NY\)](#) (9/11) reports that New York Gov. Kathy Hochul "signed into law three pieces of legislation on the anniversary of Sept. 11, 2001, all designed to expand the pool of people considered first responders during the terrorist attacks and make it easier for them to apply for benefits online. She also proposed legislation that would allow New York National Guard members to qualify as veterans under state law." Newsday adds, "One of the new laws she signed expressly defined the first responder category to include 911 operators, EMS dispatchers and others working in similar jobs as defined by local government regulations. Another signed measure allows for first responders to apply for benefits online through their relevant retirement systems," while "a third expands the definition of a World Trade Center responder to include any person who is currently a member of a public retirement system, regardless of whether the employee was a participant of the retirement system at that time of the attacks, subject to certain time limitations."

California Lawmakers May End Arrests For Loitering For Prostitution

The [AP](#) (9/11, Thompson) reports, "Police in California would no longer be able to arrest anyone for loitering with the intent to engage in prostitution under a bill approved by state lawmakers on Friday amid debate over whether the move would help or harm sex trafficking victims," but "Sen. Scott Wiener then used a procedural move to withhold the bill from the governor's consideration until next year." The delay until January "gives supporters more time to make the case about why this civil rights bill is good policy that should be signed into law and why this discriminatory loitering crime goes against California values and needs to be repealed," Wiener's office said in a statement. Wiener "argued that the crime too often depends on an officer's perception and results in disproportionate arrests of transgender, Black and Latino women."

Security, Crime, and Drugs

Florida Teens Arrested For Alleged Mass School Shooting Plot

The [Wall Street Journal](#) (9/10, Calfas, Subscription Publication) reports Lee County, Florida officials have arrested two teens for allegedly plotting a mass school shooting. A sheriff's department investigation revealed the two were devising a plan and studying the 1999 shooting at Columbine High School.

Fentanyl Has Come To The Mountain West, Driving Overdoses

[KPCW-FM](#) reports, "Fatal drug overdoses are skyrocketing, driven by synthetic opioids like fentanyl," which "has made it to the Mountain West." Steve Kotecki, who is with the Drug Enforcement Administration's Denver office, said, "Down in Mexico, it's manufactured in a garage or a warehouse or something else down there by the cartels, is manufactured and then smuggled up through the southwest border." While "Mexican cartels like fentanyl because it's cheap and powerful," it's hard to mix in a way that's safe; "the DEA says about a quarter of fentanyl pills they seized had enough of the substance to kill."

Alleged Leaders Of Oregon Motorcycle Gang Arrested

The [Walla Walla \(WA\) Union-Bulletin](#) (9/12, Maynes) reports that, in "a massive law enforcement operation" that included the Drug Enforcement Administration, on Thursday two Oregon, men, including a corrections officer in Walla Walla, "were arrested for allegedly being involved in violent crimes connected to a nationwide biker gang." Charles Montgomery and Dustin Wendelin, who worked at the Washington State Penitentiary in Walla Walla, are "alleged to be local leaders of an outlaw motorcycle gang called the Pagan's 1%."

The [Seattle Times](#) (9/10) reported the Walla Walla County Sheriff's Office "collaborated on the investigation for several months with the Spalding County Sheriff's Office in Griffin, Georgia, as well as with federal law enforcement partners."

Authorities Seize \$81 Million Worth Of Drugs In Remote San Diego County

The [Palm Springs \(CA\) Desert Sun](#) (9/12) reports the San Diego Sheriff's Department announced that over \$81 million worth of drugs "from a property in Warner Springs early Friday. ... Authorities suspect the drugs were destined for unlicensed Southern California marijuana dispensaries."

The [San Diego Union-Tribune](#) (9/11) reports investigators "found hazardous materials that they said are used to process THC and which can contaminate local ground water supply and streams." The county's hazmat team and Drug Enforcement Administration experts "were called to remove the hazardous substances."

The [Palm Springs \(CA\) Desert Sun](#) (9/12) reports the San Diego Sheriff's Department announced that over \$81 million worth of drugs "from a property in Warner Springs early Friday. ... Authorities suspect the drugs were destined for unlicensed Southern California marijuana dispensaries."

The [San Diego Union-Tribune](#) (9/11) reports investigators "found hazardous materials that they said are used to process THC and which can contaminate local ground water supply and streams." The county's hazmat team and Drug Enforcement Administration experts "were called to remove the hazardous substances."

New York Police Intel Strategies Employed After 9/11 Now Used To Fight Everyday Crime

[CNN](#) (9/11, Morales) reports, "In the aftermath of 9/11, New York City law enforcement officials developed a strategy designed to gain intelligence and develop technology to prevent any more attacks. Twenty years and hundreds of millions of dollars later, those same strategies and technological advancements are used to solve crimes." According to CNN, "The NYPD has made significant technological changes since the destruction of the World Trade Center, adding more cameras, installing license plate readers at points of entry as well as in police cars, and giving their officers smart phones that have access to records and information, officials said. These advances, among others, were developed using federal funding. Since 2017, the NYPD has spent over \$300 million each year on intelligence and counterterrorism, according to the city's independent budget office. The department's anti-terror tools also are being used to solve more run-of-the-mill crimes."

Six Los Angeles Police Department Employees Sue City Over Vaccination Mandate

The [Los Angeles Times](#) (9/12, Rector) reports that six Los Angeles Police Department employees "filed a federal lawsuit challenging the city's mandate that all L.A. employees be vaccinated against COVID-19." The lawsuit, "filed Saturday in U.S. District Court in Los Angeles, claims the mandate violates the employees' constitutional rights to privacy and due process, and asks the court to provide immediate and permanent relief from the requirement." The LAPD employees "suing include individuals 'who could not assert a medical or religious exemption' to the vaccine requirement, as well as individuals who have 'experienced and recovered from COVID-19' and have natural antibodies to fight the virus, the complaint states."

New York Governor Signs Law To Expand Pool Of First Responders

[Newsday \(NY\)](#) (9/11) reports that New York Gov. Kathy Hochul "signed into law three pieces of legislation on the anniversary of Sept. 11, 2001, all designed to expand the pool of people considered first responders during the terrorist attacks and make it easier for them to apply for benefits online. She also proposed legislation that would allow New York National Guard members to qualify as veterans under state law." Newsday adds, "One of the new laws she signed expressly defined the first responder category to include 911 operators, EMS dispatchers and others working in similar jobs as defined by local government regulations. Another signed measure allows for first responders to apply for benefits online through their relevant retirement systems," while "a third expands the definition of a World Trade Center responder to include any person who is currently a member of a public retirement system, regardless of whether the employee was a participant of the retirement system at that time of the attacks, subject to certain time limitations."

California Lawmakers May End Arrests For Loitering For Prostitution

The [AP](#) (9/11, Thompson) reports, "Police in California would no longer be able to arrest anyone for loitering with the intent to engage in prostitution under a bill approved by state lawmakers on Friday amid debate over whether the move would help or harm sex trafficking victims," but "Sen. Scott Wiener then used a procedural move to withhold the bill from the governor's consideration until next year." The delay until January "gives supporters more time to make the case about why this civil rights bill is good policy that should be signed into law and why this discriminatory loitering crime goes against California values and needs to be repealed," Wiener's office said in a statement." Wiener "argued that the crime too often depends on an officer's perception and results in disproportionate arrests of transgender, Black and Latino women."

Security, Crime, and Drugs

Florida Teens Arrested For Alleged Mass School Shooting Plot

The [Wall Street Journal](#) (9/10, Calfas, Subscription Publication) reports Lee County, Florida officials have arrested two teens for allegedly plotting a mass school shooting. A sheriff's department investigation revealed the two were devising a plan and studying the 1999 shooting at Columbine High School.

Fentanyl Has Come To The Mountain West, Driving Overdoses

[KPCW-FM](#) reports, "Fatal drug overdoses are skyrocketing, driven by synthetic opioids like fentanyl," which "has made it to the Mountain West." Steve Kotecki, who is with the Drug Enforcement Administration's Denver office, said, "Down in Mexico, it's manufactured in a garage or a warehouse or something else down there by the cartels, is manufactured and then smuggled up through the southwest border." While "Mexican cartels like fentanyl because it's cheap and powerful," it's hard to mix in a way that's safe; "the DEA says about a quarter of fentanyl pills they seized had enough of the substance to kill."

Alleged Leaders Of Oregon Motorcycle Gang Arrested

The [Walla Walla \(WA\) Union-Bulletin](#) (9/12, Maynes) reports that, in "a massive law enforcement operation" that included the Drug Enforcement Administration, on Thursday two Oregon, men, including a corrections officer in Walla Walla, "were arrested for allegedly being involved in violent crimes connected to a nationwide biker gang." Charles Montgomery and Dustin Wendelin, who worked at the Washington State Penitentiary in Walla Walla, are "alleged to be local leaders of an outlaw motorcycle gang called the Pagan's 1%."

The [Seattle Times](#) (9/10) reported the Walla Walla County Sheriff's Office "collaborated on the investigation for several months with the Spalding County Sheriff's Office in Griffin, Georgia, as well as with federal law enforcement partners."

Authorities Seize \$81 Million Worth Of Drugs In Remote San Diego County

The [Palm Springs \(CA\) Desert Sun](#) (9/12) reports the San Diego Sheriff's Department announced that over \$81 million worth of drugs "from a property in Warner Springs early Friday. ... Authorities suspect the drugs were destined for unlicensed Southern California marijuana dispensaries."

The [San Diego Union-Tribune](#) (9/11) reports investigators "found hazardous materials that they said are used to process THC and which can contaminate local ground water supply and streams." The county's hazmat team and Drug Enforcement Administration experts "were called to remove the hazardous substances."

Subject: How to Increase Accountability for Better Crime Results

*** Email From An External Source ***

There's still time to register for the remaining seats at the Colorado Springs Command Academy that SmartForce is sponsoring the last week of October.

Typically, the training course on implementing more accountability to improve your organizational crime results runs \$12,000 per agency, but with the SmartForce sponsorship your cost is just the registration fee of \$395, *and* all meals are included!

In addition, other speakers will cover License Plate Reader & GPS technology, Use of Force updates, police reform State reporting requirements, police leadership, and more.

Everyone is busy, but take the time to learn how you and your agency can become more productive at this low-cost, high-value training conference.

Since IACP was cancelled, use those training and travel dollars to register now or reply back with questions so you don't miss out on one of the best in-person conferences of the year!

Brian McGrew

VP of Education
